To: Weiss, Ed

Subject: RE: Data on polygon connected to 334-40-11000-2125-3912

Ed, it was nominated in 1986 for the 1987 revision. Juvenile chinook salmon were captured with both a dip net and minnow bucket. It is a interconnected spring fed complex. Juvenile chinooks were visually observed throughout it. I am mailing you a copy of the original nomination.

Subject: Data on polygon connected to 334-40-11000-2125-3912

Date: Thursday, October 23, 1997 2:33PM

Mac does Region III have any data on the polygon connected to AWC stream 334-40-11000-2125-3912 in section 29 & 30 of T28N R12W, Wiseman A-1. I have a note here to number it. Since it's not numbered it doesn't appear in the Catalog. However, in order to do so I need to get some back up documentation. It doesn't appear on early versions of the map however, there is nothing in our files here to indicate when or why it was added. Could you please check your files and send me copies of any documentation you might have. Thanks.
