Comments: I observed 5 spawning coho salmon on the upper part of Beaver Creek, a tributary to the Anchor River on 10/4/00 in a location above where adult coho salmon have been reported in the catalog.

Specific location of observation: N 59 44.954 W 151 19.941. The stream crosses under the road through a culvert at the location where the biggest puddles are in the road in the first photo graph. The second photograph is taken from the road looking downstream. Spawning was occurring immediately above and below the culvert.
