IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
 Two juvenile (fry) coho (approximately 70mm long) were captured with a salmon roe baited minnow trap, in Cloudy Lake, approximately 30 yards east of Cloudy Lake outlet culvert inlet.
 Trap set: 4/5/01 - 1010
 Trap pulled: 4/6/01 - 0900
 The two coho captured on 4/6/01 were captured in the non-cataloged Cloudy Lake. The lake's outlet stream is currently cataloged to the outlet of Cloudy Lake. Hence, the AWC # given in the "AWC# of Waterway" cell above.

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
