					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

Please see attached map for stream location.

*Per W. Frost 4/8/02
No proof DV are Anadromous*

COMMENTS

Lake was snorkeled for ~20 minutes with no fish observed along lake margins. Inlet stream to the lake was not surveyed, only angling in the lake. A school of Dollies was holding at the mouth of the largest inlet. The outlet was snorkeled downstream for ~ 10min with no fish observed.
