IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: We walked this creek from the mouth to the Shotgun Cove Creek Bridge. Just above the bridge is a barrier to fish passage. We saw the last of approximately 5 (five) adult coho about 30-50 feet below the bridge. Please see attached map and photos.
