IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
 Observed approximately 50 pink salmon & 4 chum salmon spawning (Foot Survey) in the lower ~300 feet of stream below a 20 ft. plus waterfall. Spawning was observed between ^{above} MLW and the base of the waterfall.
