IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
15 Coho, 8 Dolly Varden - both juvenile trapped. Phil North (EPA) and Lynnda Khan (USFWS) present and witness to trapping. Significance is that rearing habitat is on the opposite side of the Sterling highway from current documentation. *see shapefile Coordinates (Lat/Long): Upper(60.5339\ -149.5659) Lower(60.5329\ -149.5695)
