Subject: RE: Cornelius Lake - MORE

I just took a look at the map and there is a Sockeye end point above the lake but you are right the lake itself does not have a sockeye or sockeye spawning designation. I'll forward this to J. Were you going to put a nomination together with any data available or do you want me to do it?

Subject: Cornelius Lake

Ed:

Reading in the great book of random numbers I see that you only have COsr for Cornelius Lake. I presume that this is a database error. Sockeye spawning and rearing has been documented for years and probably even witnessed by you.

Tom

247-50-10300-2054

99-233
99-346
99-233
99-231

Nomination 99-233 (attached) added presence of Sockeye salmon to 247-50-10300-2054

There were no instructions to add Sp to Cornelius Lake
I've put together a dB change form to add Sp to Cornelius, if you have additional info to add spawning or rearing, let me know.

Attachments: CORNELIUS FISH SURVEY DATA.xls

CORNELIUS FISH
SURVEY DATA.xls...

Yea, that was probably an oversight on my part. Attached is an Excel spreadsheet that contains observation data of spawning fish and presence data from the Cottonwood Creek watershed project I did. It's a combination of historic observations I could find and of surveys that Doug Hill was doing for SF Palmer in 98.
