**To:** david\_westerman@fishgame.state.ak.us  
**Subject:** RE: euchalon

Would you be willing to sign off on a nomination to add eulachon presence (spawning?) to Kenai River to a point just below Skilak Lake based on observations by you and others? If so, I'll get a map together w/nom and send down for your review and signature. Any other local sites you might be aware of that are not already documented in AWC?

---

**To:** j\_johnson@fishgame.state.ak.us  
**Subject:** RE: euchalon

So far, all I have is eyewitness accounts. I've seen them as far as the Killely River and others have seen them just below Skilak.

**Subject:** RE: euchalon

I'll amend nom to extend eulachon to Stilak L. Supporting info would be good to have to backup nom.  
 thx

**Subject:** RE: euchalon

We know they (euchalon) go as far as Skilak lake, no reports of them going higher. If you need literature, I'll have to dig deep, I know of none but that's not to say it doesn't exist.

Dave

9/19/2006

I've been working w/Betsy McCracken to add euchalon to AWC. Believe or not, euchalon are not listed in Kenai River. Betsy has personally observed them to Cunningham Park. Have you or anyone in the office observed them further upstream? If so, can you provide lat/long or good landmark I can use? Any literature in your office related to euchalon observations in the Kenai River or other Kenai Peninsula streams?
