OBSERVATION INFORMATION

| Species      | Date(s) Observed | Spawning | Rearing | Present | Anadromous                          |
|--------------|------------------|----------|---------|---------|-------------------------------------|
| Coho Salmon  | 6/21/2006        |          | 2       |         | <input checked="" type="checkbox"/> |
| Dolly Varden | 6/21/2006        |          | 26      |         | <input type="checkbox"/> ?          |
|              |                  |          |         |         | <input type="checkbox"/>            |
|              |                  |          |         |         | <input type="checkbox"/>            |
|              |                  |          |         |         | <input type="checkbox"/>            |

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** Fish captured by electro-fishing (all released). 3616 seconds shock time for three 50-meter stream reaches, each separated from the other by 50 meters. Coho nose-fork lengths ranged were 10.1 and 13.5 cm (dollies 5.6 - 9.7). Stream habitat: alternating runs, riffles, glides and pools; width 0.79 to 2.70 meters, depth 0.13 to 0.95 meters at thalweg. Bottom sediment: peat, fines, sand, gravel, and wood.

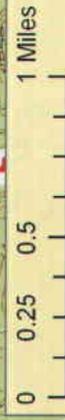

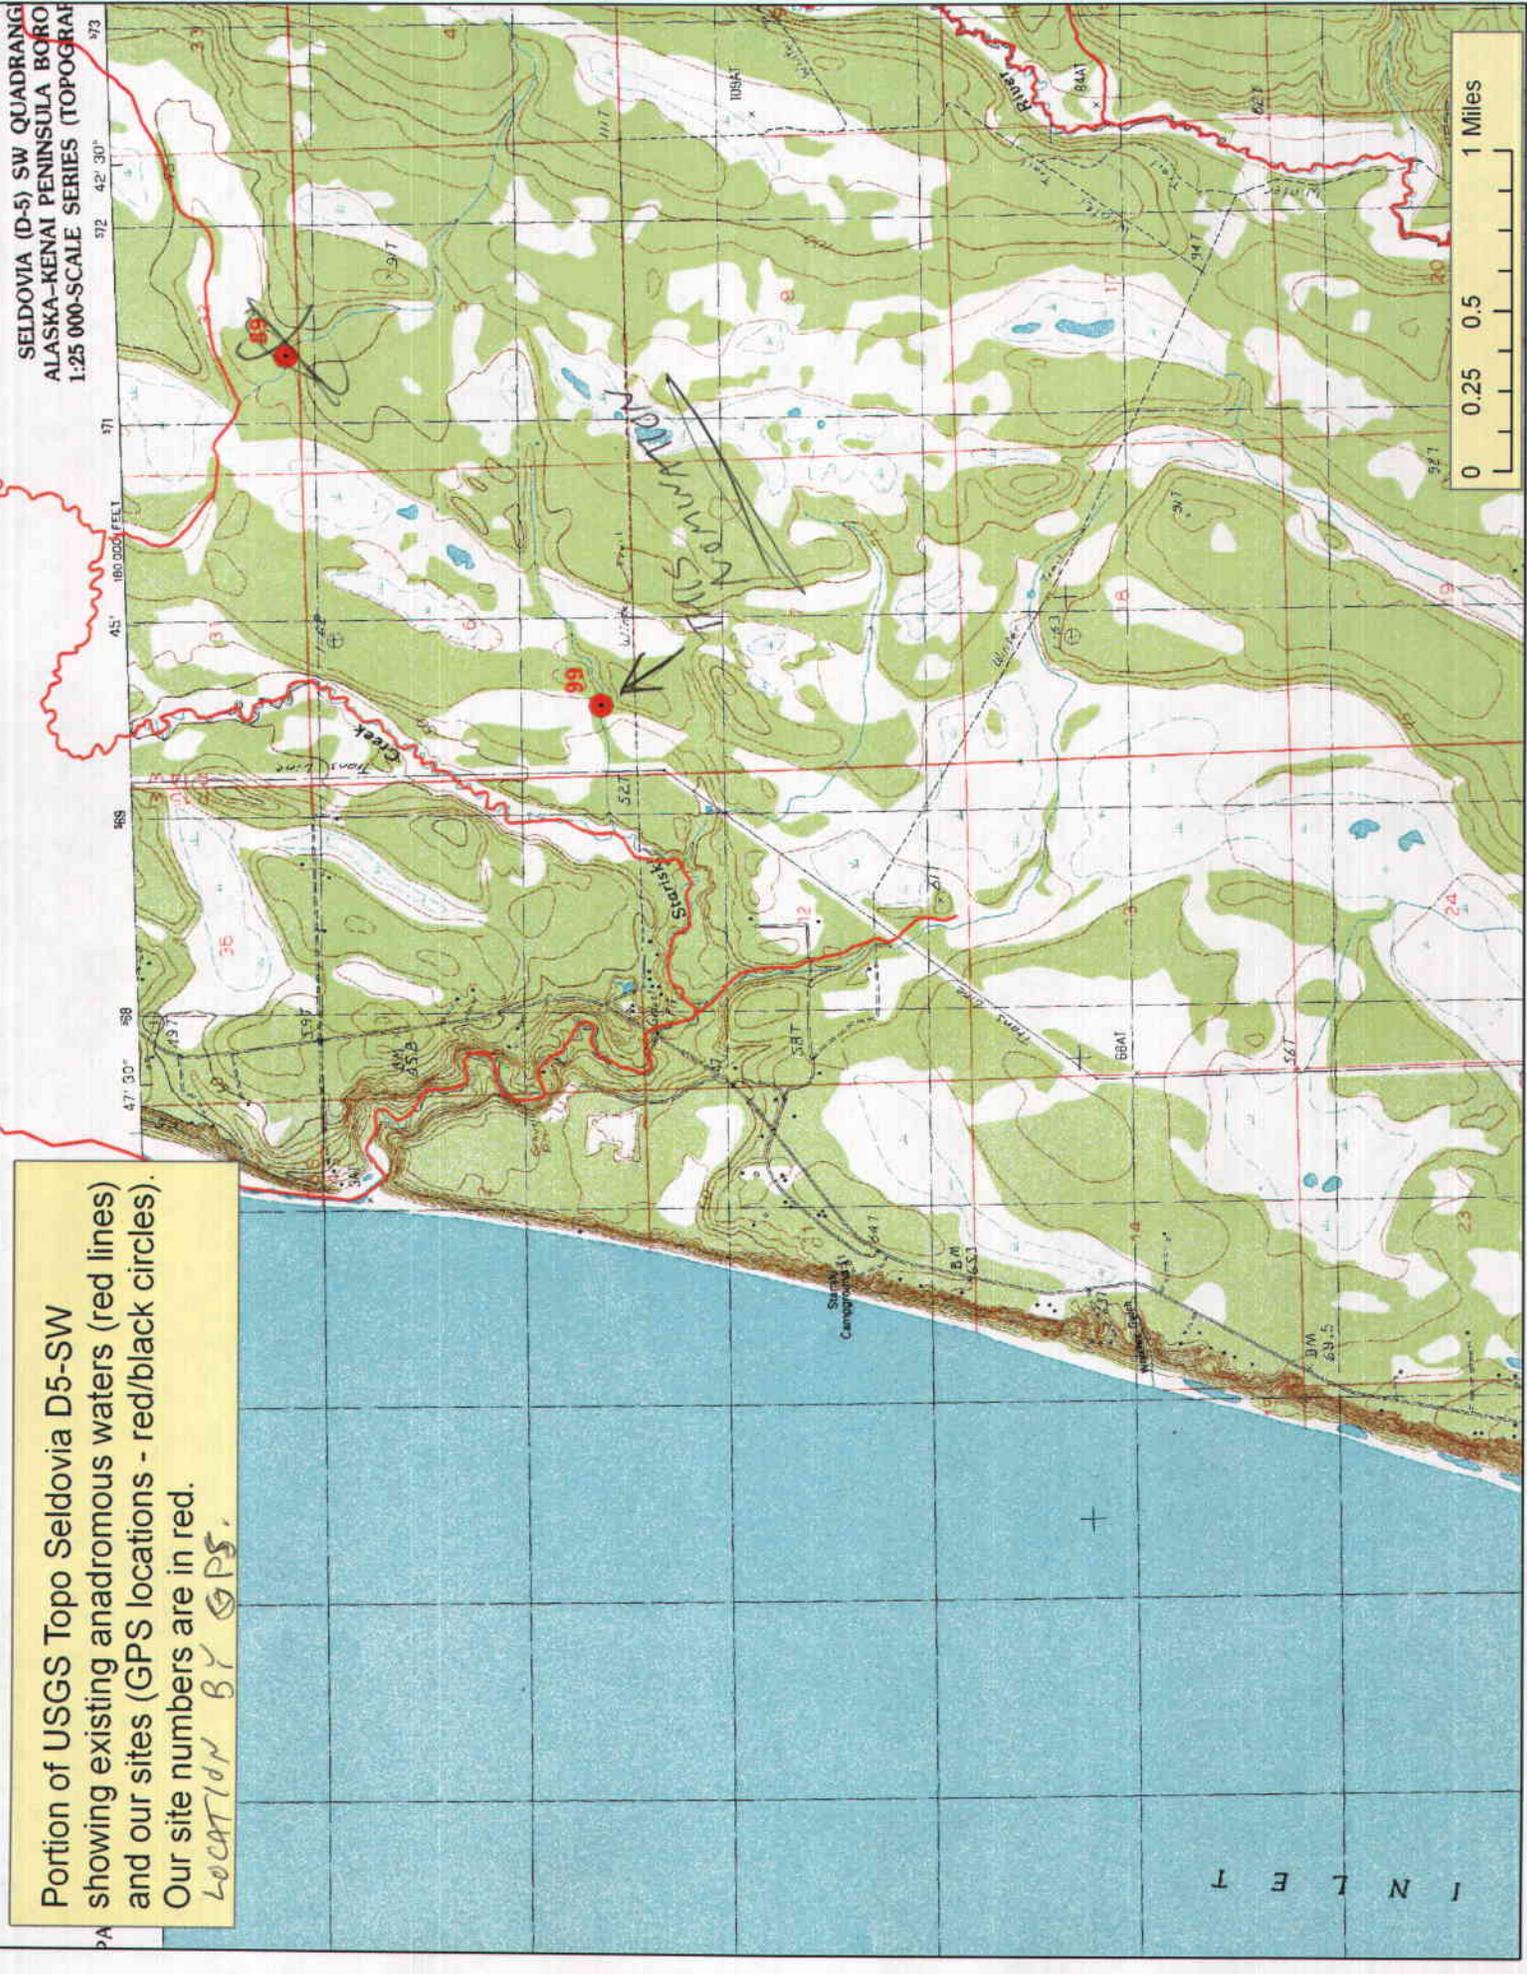

GPS coordinates (UTM, NAD 83, UTM zone 05 N): 569430, 6635736 (easting, northing). Site #99 in our study.  
 See attached photos and map. Add new stream 244-10-10010-2016 w/ coho salmon and Dolly Varden rearing
