OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	6/15/2006		2 juvenile		<input checked="" type="checkbox"/>
coho salmon	10/2/2007		1 juvenile		<input checked="" type="checkbox"/>
coho salmon	10/2/2007			2 adult carcasses	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
 OHMP biologists Scott Maclean and Ed Weiss captured 2 coho fry with a dipnet on 6/15/06 and observed about 8 more coho fry swimming nearby.
 OHMP biologists Megan Marie and Will Frost captured 1 juvenile coho with a minnow trap baited with salmon roe on 10/2/07. The trap soaked for about 30 min. and the coho captured measured approximately 80mm (fork length). We also observed at least 10 more coho, approximately 80-100 mm (fork length), swimming in the area of the trap. We also observed two coho carcasses, one male and one female upstream of the minnow trapping site.
 No barriers to juvenile or adult migration up to the upper limit noted in catalog. Stream forks to right below upper limit and no barriers for at least 50 yds. upstream in the tributary. Did not observe any juveniles in the tributary but additional investigation should be conducted next field season.

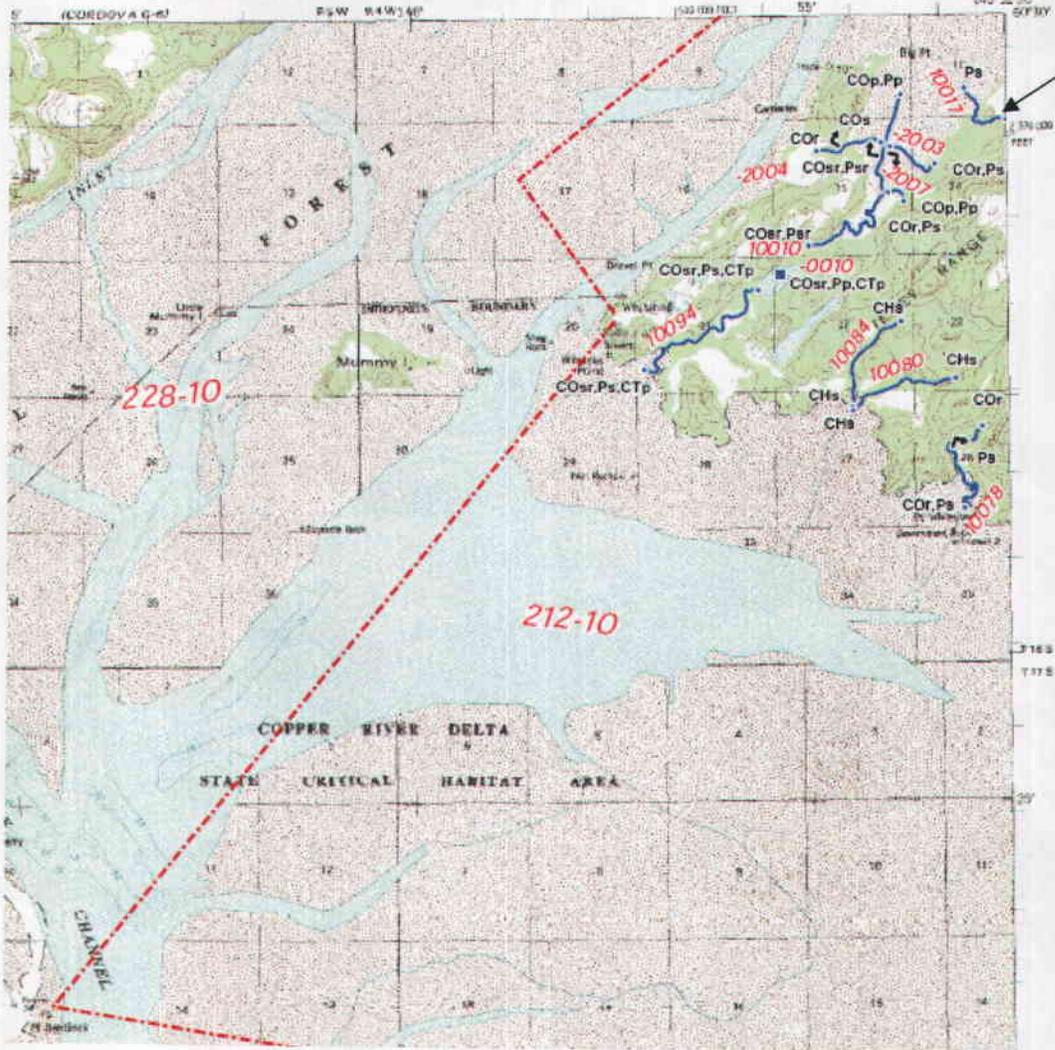

Name of Observer (please print): Megan Marie
 Signature: [Signature] Date: 10/15/2007
 Agency: ADNR-Office of Habitat Management & Permitting
 Address: 550 W. 7th Ave, Suite 1420
Anchorage, AK 99501

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Fish Distribution Database.
