OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Coho Salmon	10/10/96	7	18		25
Dolly Varden	10/10/96		2		

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: On 10/10/96 I set 4 minnow traps in Pollard Lake and its outlet. Trap #1 set for 1 hour in Pollard Lake. It caught 3 stickleback. Trap #2 set for 1 hour in the outlet of the lake. It caught 2 stickleback, 3 Coho fingerlings and 1 Dolly Varden. Trap #3 set in the lake near the outlet for 1 hour. It caught 4 stickleback and 7 Coho fingerlings. Trap #4 set for 30 minutes in the stream between Upper and Lower Pollard Lake. It caught 8 Coho fingerlings and 1 Dolly Varden. I observed 6 adult spawning Coho in the outlet and 1 adult spawning Coho in Upper Pollard Lake.

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
Silver Salmon	October of many years	X	X	X	X

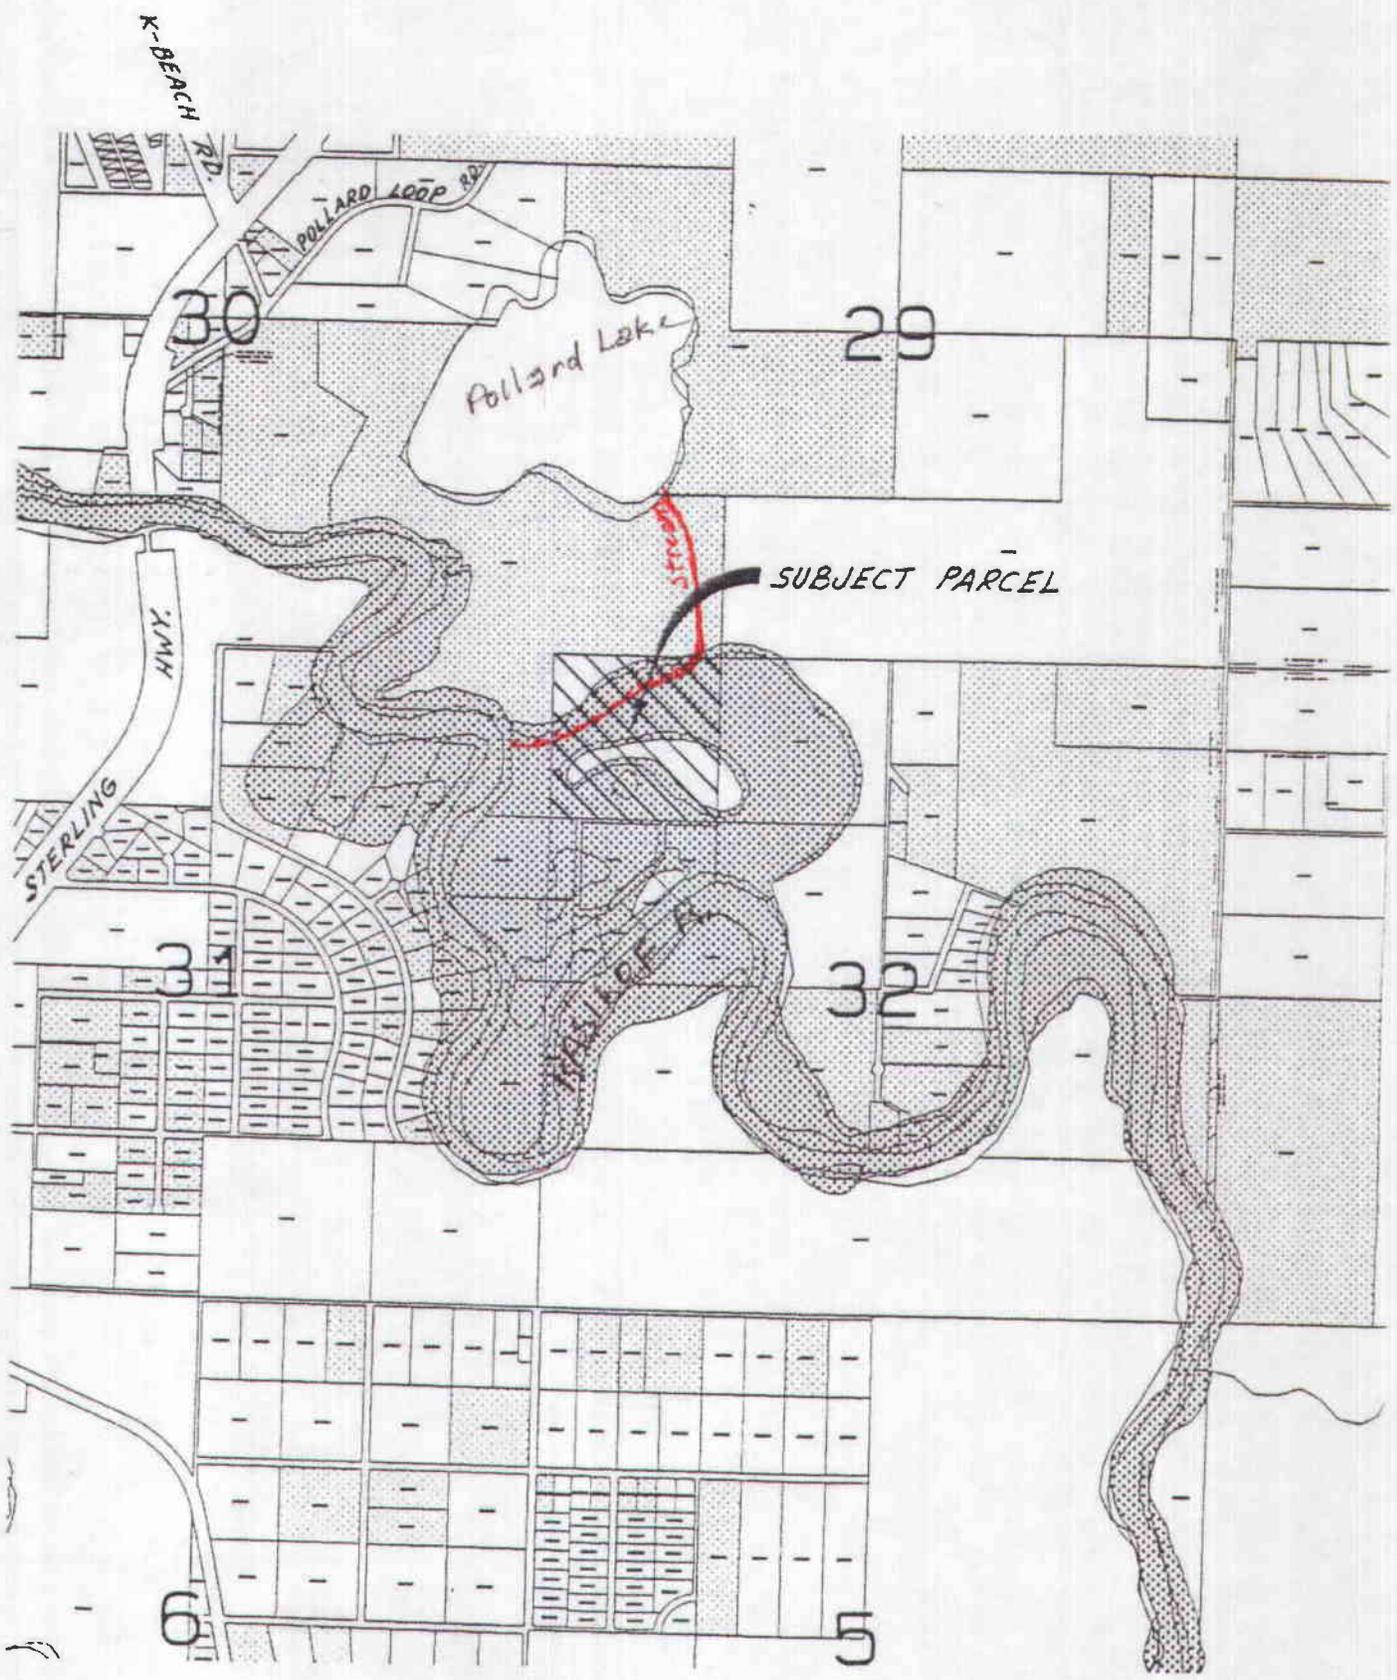

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: This small stream runs from Pollard Lake to the Kaslof River (see attached). In October and November there is a small run of silver salmon estimated (by four observers very knowledgeable of the stream) to number 75-100 fish. The salmon spawn in the stream and some are seen in the lake (presumably spawned out fish. The fry rear in the lake to fingerling size.
