OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho salmon	8/16/2007		2		<input checked="" type="checkbox"/>
Dolly Varden	8/16/2007			9	<input type="checkbox"/>
Sculpin spp.	8/16/2007			18	<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**  
 See attached memo and map.  
 Add new stream 247-50-10260-2019-3080 w/ coho salmon rearing  
 USFWS will provide digital map for unmapped water body

**To:** J. Johnson, ADFG, FDD Project Biologist  
**From:** Jeffry Anderson, Fishery Biologist  
**Subject:** Nomination of Unnamed Tributary to Wasilla Creek

Following is supporting documentation for nomination of an unnamed tributary to Wasilla Creek to the *Catalog of Waters Important to the Spawning, Rearing, or Migration of Anadromous Fishes*. We used single-pass electrofishing following the methods of J. Buckwalter (*FY2008 Field Methods, Inventory of fish distribution in the upper Kuskokwim River drainage*).

We sampled one site on the stream above and below a culvert where the stream crosses Bonny Drive. The stream is not mapped at the 1:63,360 scale and a rough map is traced in blue ink on the attached map. The stream originates in a pond that is shown on the map and drains into Wasilla Creek just upstream of the crossing at the Palmer-Fishhook Road. Bill Rice with the USFWS in Anchorage has a digital line of the stream in question, and the coordinate information will be provided to ADFG. The sample site is identified with a red circle on the attached map. A barrier to upstream migration probably occurs at the coordinates listed in Table 1 where the stream passes through a small culvert crossing under an abandoned private road. Complete sampling information, including habitat data, will be provided following completion of a report later this fall. Table 1 provides location information for the sample site; Table 2 provides fish sampling data.

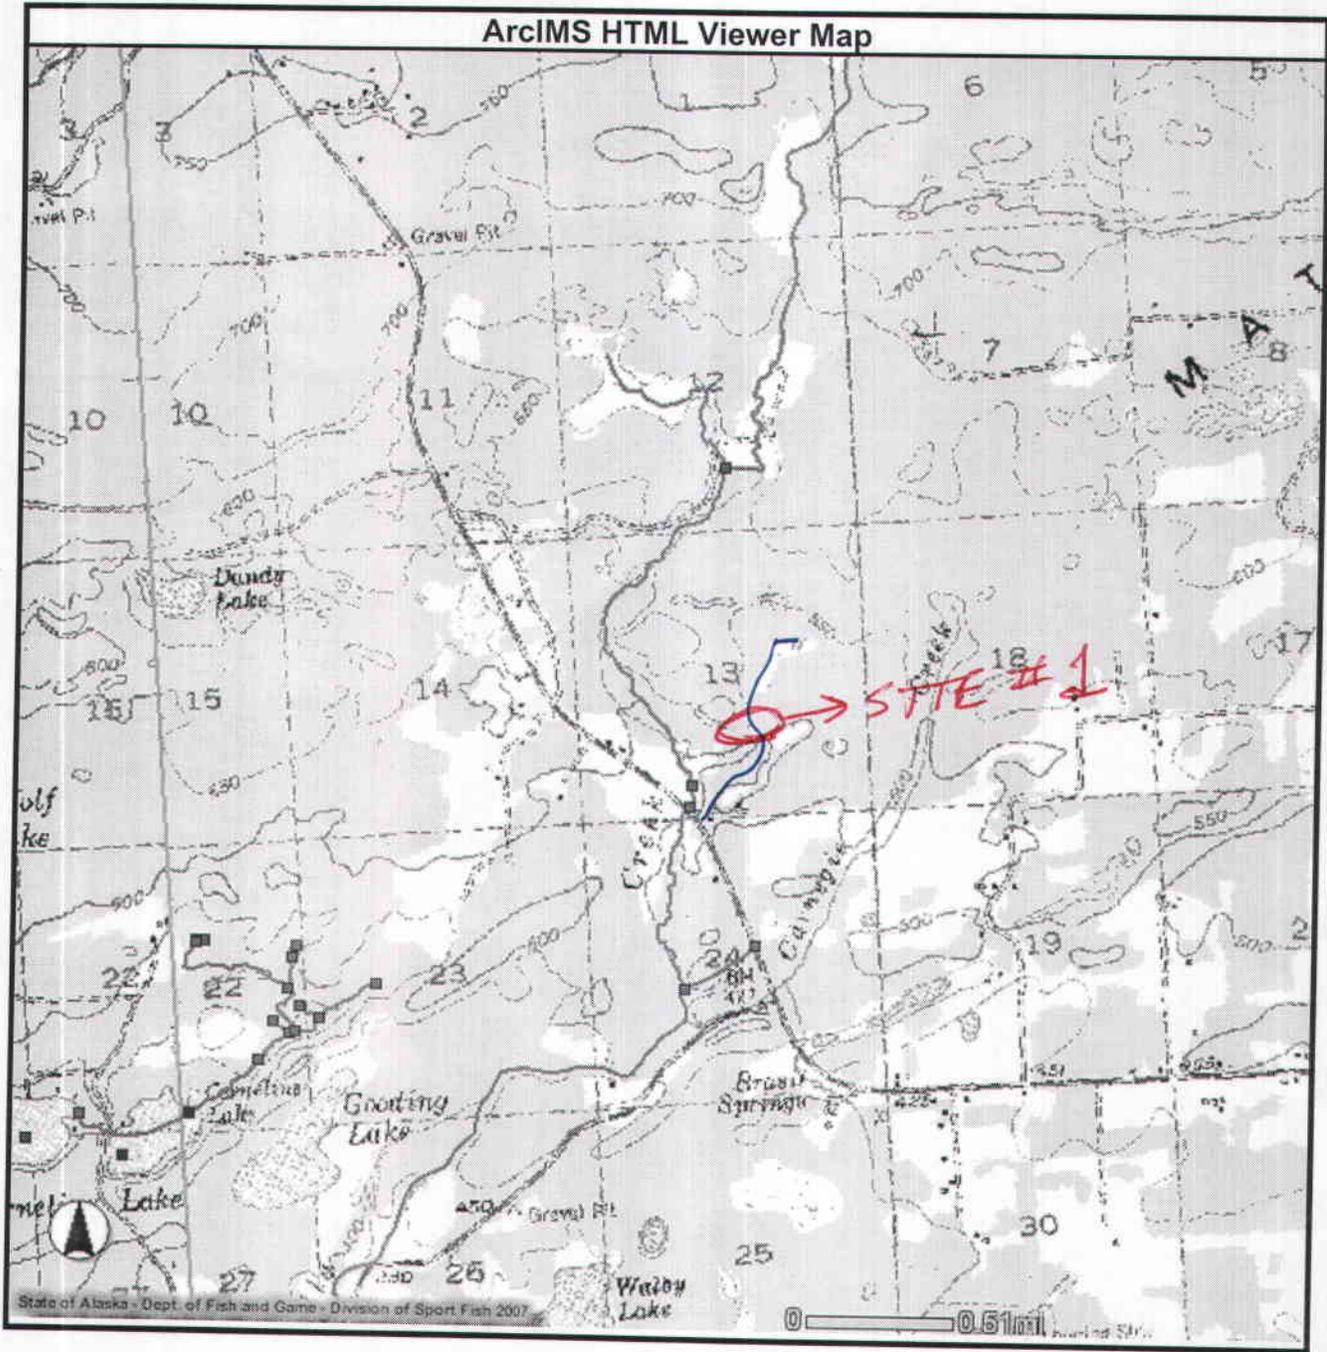

Table 1. Sampling dates and site locations for unnamed tributary to Wasilla Creek, 2007. Latitude and longitude coordinates are in decimal degrees, NAD27.

Date	Site No.	Latitude	Longitude
8/16/07	1	61.64753	149.18936

Table 2. Fish sampling data for Site No. 1, unnamed tributary to Wasilla Creek, 2007. Fish lengths are total length (mm).

Species	Number sampled	Minimum length	Maximum length
Coho salmon	2	104	109
Dolly Varden	9	--	--
Sculpin spp.	18	--	--
