**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

Inclusion of Indian Creek (244-30-10050-2115) in AWC is minimally supported by historic data  
*Extremely glacial, counts extremely difficult, often impossible.*  
*Narrow canyon and falls approximately 3 miles upstream believed to be complete barrier to farther salmon migration.*  
*Sockeye salmon - 2004 - Soldotna Comm. Fish Archives.*  
*Sp, COsp - On file Soldotna Sport Fish Share Drive.*
