					☐
					☐
					☐

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes, etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Adult coho salmon were seen exhibiting spawning behavior in the inlet stream to Rainbow Lake (currently specified for coho rearing - waterbody # above) above the culvert and fish ladder at the Karen Rd crossing. 3 adults positively identified immediately upstream of culvert, several others (est. 6-12) milling in the ponded area upstream of the road. Observation was during afternoon with good light. Distance to fish less than 10 ft.

Name of Observer (please print): Matthew LaCroix
