IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
 Two baited minnow traps were soaked for 4 hours 75 feet and 400 feet above the Alaska Railroad ROW. The trap set 75 feet above the tracks captured one juvenile coho salmon and 50 stickleback. The trap set at 400 feet captured 100 stickleback.
Extend 247-60-10235 w/ coho salmon rearing
