OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Sockeye	16 August 2007	Yes		Yes	<input checked="" type="checkbox"/>
Sockeye	10 September 2007	Yes		Yes	<input checked="" type="checkbox"/>
Sockeye	14 August 2009	Yes		Yes	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

Add short stream 224-10-14540-2006-3002 & 3002-2010 u/sockeye

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Datum: WGS 8471767
 16 August 2007: 60.71601N, -148.42045W ← 42.718 1 carcass, 15 live sockeye
 10 September 2007: 60.71775N, -148.42706W ← 42.718 3 carcasses, 20 live sockeye
 14 August 2009: 60.71795N, -148.42566W ← 1 carcass, 20 live sockeye
 → 3 wild sockeye, but 4 were hatchery (Main Bay). All observations of live fish were made in a small (75m x 30m) clearwater pool near these coordinates.

Name of Observer (please print): Richard E. Brenner
 Signature: [Signature] Date: 20 August 2009
 Agency: Alaska Dept. of Fish and Game
 Address: 401 Railroad Ave.
Cordova, Alaska 99574-0669

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Fish Distribution Database.

Subject: RE:

Hi J,

After looking at your plot, it looks like I made a mistake on one set of coordinates that I gave you for Halferty Creek sockeye.

The August 16th 2007 coordinates for 15 live sockeye should have been N60.71767, W148.42718, **NOT** N60.71601, W148.42045 as I sent you previously.

The coordinates that I sent you for this date were for a location at which I found a sockeye carcass, not for where the 15 live sockeye were spawning. I just checked my track log and waypoints for 2007 and trust the new coordinates. Thanks for plotting this out.

Take care,
rich

Rich

Take a look at the attached
Each lat/long you provided is marked w/dot
If locations look good to you, I'll be adding sockeye salmon spawning to Halferty (224-10-14540) & 224-10-14540-2006 (creek to north & west)
Let me know if locations need to be adjusted

thx
