Subject: Exit Creek point update

Hello J,
I reviewed the Exit Glacier observations for both the pink salmon and the Dolly varden. Both observations were in approximately the same location. So, the appropriate location for the pink salmon form is: 60.19535, -149.59035. I am not sure how the incorrect lat/long was entered. I am sorry for any confusion. Please let me know if you have any other questions.
Thank you,
Caroline
