**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** Aerial surveys have been conducted on this system and observers have documented the presence of Pink. See the attached database for substantiation: cf2\_saspop\_2000.mdb.  
  
 The lat/long. coordinates for this stream in the spreadsheet: pws\_no\_nom\_species\_location do not match the coordinates in the database. The stream AWC numbers match and that is what was used to substantiate the nomination.
