OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Chum	7/27/1970			x	<input checked="" type="checkbox"/>
Pink	1963-1968			x	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** Aerial surveys have been conducted on this system and observers have documented the presence of Chum and Pink. See the attached database for substantiation: cf2\_saspop\_2000.mdb.

Not sure that this waterway is truly the one listed on the pws\_no\_nom\_species\_location spreadsheet. The Stream AWC Codes match, but the lat/long coordinates are different, since the survey took place in 1991, I have no way of asking the observer.
