					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**  
 4 fish observed while mapping the saltmarsh habitat around Iniskin River. Fish were present in spawning colors in an unnamed tributary of the Iniskin River (248-20-10080). No spawning behavior observed.  
 The GPS location of the tributary is: 59 48 12.1 -153 27 37.8 (WGS84).  
 Note: this unnamed tributary is mapped as part of the USGS DLG data set.  
 Add new stream 248-20-10080-2002 w/ CHUM SALMON presence, substantiates presence of Chum salmon in 248-20-10080

J:

Since we know that chums extensively utilize the mainstem Iniskin River, it doesn't surprise me that they've been documented in this small marsh tributary of that system. I have no reason to dispute the presence of chum salmon in the unnamed creek and therefore do not oppose it's inclusion in the AWC.

Thanks for the opportunity to weigh in on this.

Lee

Lee

Oriana Badajos (Kachemak Bay Research Reserve) submitted the attached nomination to add a new stream w/chum salmon presence to FDD/AWC. I'd appreciate it if you look over the attached. Please endorse if you agree that nominated water body should be added to FDD/AWC. You can provide endorsement via email and/or sign nomination form and return to me via mail. thx
