**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**  
 This confirms that Chinook salmon spawn in the South Fork of Eagle River up to the water falls. This extends the spawning range in this stream from old anadromous maps.  
Extend Chinook salmon spawning in stream
