IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat, locations, types, and heights of any barriers; etc.

Comments:
 During a foot survey I observed about 100 adult Sockeye Salmon and 100 adult Chum Salmon spawning in the shallow areas of Williwaw Ponds I and II (Figures 1 and 2). Williwaw Ponds I and II are groundwater fed and flow into Williwaw Creek. The visibility during the survey was good.
add new streams w/ chum and sockeye salmon present
add new lakes w/ chum and sockeye salmon spawning
