OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Coho	7/19/2006		X		<input checked="" type="checkbox"/>
Dolly Varden	7/19/2006			X	<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Two culverts drain separate lake systems separated by tree lined uplands upstream of the ARRC embankment and by access road downstream of ARRC embankment and upstream of Seward Hwy mile post 83.3 (Figures 1 and 2). Culvert one is associated with AWC stream number 247-60-10240. Culvert two is a non-cataloged anadromous fish stream. Numerous YOY rearing coho salmon, larger coho, Dolly Varden and stickleback were present at both locations. ADF&G Fish Passage Inventory (ANC04-4A226) classes culvert two as GREEN.

Add new stream and lake w/coho salmon REARING

Name of Observer (please print): Edward W. Weiss Date: 9/19/2011
 Signature: [Signature]
 Agency: ADF&G, Division of Habitat
 Address: 333 Raspberry Road
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
