OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Juvenile coho	9/22/2011		X		<input checked="" type="checkbox"/>
Dolly Varden	9/22/2011			X	<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

During a foot survey, I observed 25 Juvenile YOY coho salmon and Dolly Varden in the stream flowing through the meadow before entering the ARRC culvert. The water clarity was good. In 2008, the ARRC replaced a failed tidally influenced culvert with a 48-inch diameter culvert (FH 08-II-0140). About 550 feet upstream of the ARRC culvert is a perched 48-inch diameter culvert located under the Seward Highway. This culvert is a barrier to fish passage (ADF&G ANC 044A199).

Add new stream w/ coho salmon rearing

Name of Observer (please print): William Frost
 Signature: [Signature] Date: 9/22/2011
 Agency: ADF&G, Division of Habitat
 Address: 333 Raspberry Road
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
