OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Pink	1995-2005	X			<input checked="" type="checkbox"/>
Sockeye	1995-2005	X			<input checked="" type="checkbox"/>
Chum	1995-2005	X			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

I conducted U.S. Forest Service foot surveys at Shrode Creek in Long Bay, Prince William Sound. Up to 3,000 pink, sockeye and chum salmon were observed spawning annually.

The U.S. Forest Service has operated a concrete Fish Ladder adjacent to the outlet falls since the late 1950s.

Name of Observer (please print): Will Frost, Habitat Biologist  
 Signature: [Signature] Date: 12/15/2011  
 Agency: ADF&G, Division of Habitat  
 Address: 333 Raspberry Road  
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
