IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

U.S.G.S map for Hobo Bay shows a fish pass at the outlet of Hobo Creek. Because of maintenance costs and minor use by salmon, the "Alaska Steep Pass" fish ladder was removed by the U.S. Forest Service in about 2004. Adult fish still pass the barrier.
