IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

I conducted U.S. Forest Service foot surveys at Derickson Creek in Derickson Bay, Prince William Sound. Up to 3,000 pink and chum salmon were observed spawning annually.

An "Alaskan Steep Pass" fish ladder was installed in the 1980s. The ladder is tidally influenced.
