OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Pink up to 5,000	1995-2005	X			<input checked="" type="checkbox"/>
Chum up to 1,000	1995-2005	X			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

Add new stream w/ Chum and pink salmon spawning

I conducted U.S. Forest Service foot surveys at the Pigot Bay Spawning Channel, Prince William Sound. The upper extent of observed fish in the spawning channel is at Lat 60.5168, Long -148.2409 (Figures 1 through 3). The spawning channel is about 2,500 feet long by 25 feet wide and groundwater fed. The channel is isolated from the Pigot River. 60.8601 - 148.4008  
 The spawning channel was constructed to replace lost spawning habitat from the 1964 earth quake.

Name of Observer (please print): Will Frost, Habitat Biologist  
 Signature: \_\_\_\_\_ Date: 12/15/2011  
 Agency: ADF&G, Division of Habitat  
 Address: 333 Raspberry Road  
Anchorage, AK 99518

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.
