Add Chinook, coho and sockeye salmon rearing to stream

Additional Comments: Add coho salmon rearing, Chinook salmon rearing, and sockeye salmon rearing. Juvenile coho salmon were found throughout the entire sampled reach. However, juvenile Chinook and sockeye salmon were only found in the last bend before the downstream end of the reach (up to N60.30351, W151.24131). These observations also provide backup documentation for Chinook salmon spawning, sockeye salmon present, and Dolly Varden present in the reach.
