					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

Penelope and Ricky Haas surveyed Heney Creek at low tide, from intertidal zone up to the bridge. Survey conditions: cloudy, wet, and windy. All fish found were pinks.
 •Waypoints 001 and 008-016 correspond to individual dead fish. (All dead fish in intertidal zone).
 •Waypoints 002-007 correspond to live fish, in groups of 2-4 each. (All live fish upstream of intertidal zone).
 Also see photographs, labeled according to waypoint.
 All coordinates WGS-84 Total live count: 15 Total dead count: 10
