OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Dolly Varden	9/9/2012		Y		☐
					☐
					☐
					☐
					☐

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: The purpose of this nomination is to add a new stream (248-10-10002-XXX7) to the current AWC for DVr. Supporting data are provided in the attached MS Excel file '2012_CookInletAWCSupportingData_20130104.xls' and are summarized in the attached Table 9 and Figure 4. Observers were D. Roon, M. Lawrence, and M. Parks (R2 Resource Consultants, Inc.).

This stream was identified as a right bank (looking downstream) tributary to Sunday Creek (248-10-10002) during foot surveys. The associated fish observations were located in the mouth of this tributary.

Unknown whether anadromous

Subject: Change to FRP SF2012-280d AWC Nominations

Hi J.

After further review, we feel it necessary to revise the AWC nominations submitted to ADF&G for FRP SF2012-280d on 1/04/2013. Due to the difficulty in accurately distinguishing between Arctic char and Dolly Varden using visual observations alone, ADF&G recommended that R2 staff combine all *Salvelinus* observations into one classification during this study. As a result all observations were initially recorded as Dolly Varden. However, we would prefer that all records for Dolly Varden in the AWC nominations for these watersheds be updated to unspecified char species.

Thanks again for your help and let me know if you have further questions.

David
