IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: add pink salmon spawning to stream
 J. Canfield, B. Behrends. observed seven thousand live pink salmon in the stream with an additional fifteen thousand at the mouth. Also, this creek has long been an ADF&G aerial survey stream for pink salmon.
