OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Pink Salmon	8.7.2009	X			<input checked="" type="checkbox"/>
Chum Salmon	8.7.2009	X			<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Change to USGS name in dB
 Bear Creek (USGS), King Creek (local name), has been an aerial surveyed stream since the 1960s.
 Jeremy Botz observed 2000 pink, 15 chum in the mouth and 500 pinks, 20 chum in the stream. These were all live salmon observed by aerial survey in a PA12 with aerial survey pilot Roger Behymer.
Change chum present to spawning in creek

Name of Observer (please print): Jeremy Botz
