IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:

During a foot survey, I observed about 10 coho salmon spawning in the channel (Figures 1 and 2). The channel was constructed by the U.S. Forest Service in 1989.

Add coho salmon spawning to stream
