IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

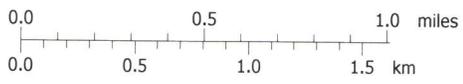

Comments
 site: 61.65369 N, -149.49881 W
 22 juvenile Chinook were captured by minnow trapping. 20 traps were baited with salmon roe, placed approximately 10 m apart within a 200 m stream reach, and soaked for 20-24 hours. Salmon present above Seitze road crossing.
Add Chinook salmon REARING / present to creek
