OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
K	7/31/2014		X		<input checked="" type="checkbox"/>
CO	7/31/2014, 8/1/2014		x		<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments**  
site: 62.5166 N, -150.12444 W  
133 juvenile coho and 2 juvenile Chinook were captured by minnow trapping. 20 traps were baited with salmon roe, placed approximately 10 m apart within a 200 m stream reach, and soaked for 20-24 hours. 10 juvenile coho were captured by seine. Two seine pulls were conducted at each of three sites within the slough.  
Add new stream w/ Chinook and coho salmon REARING

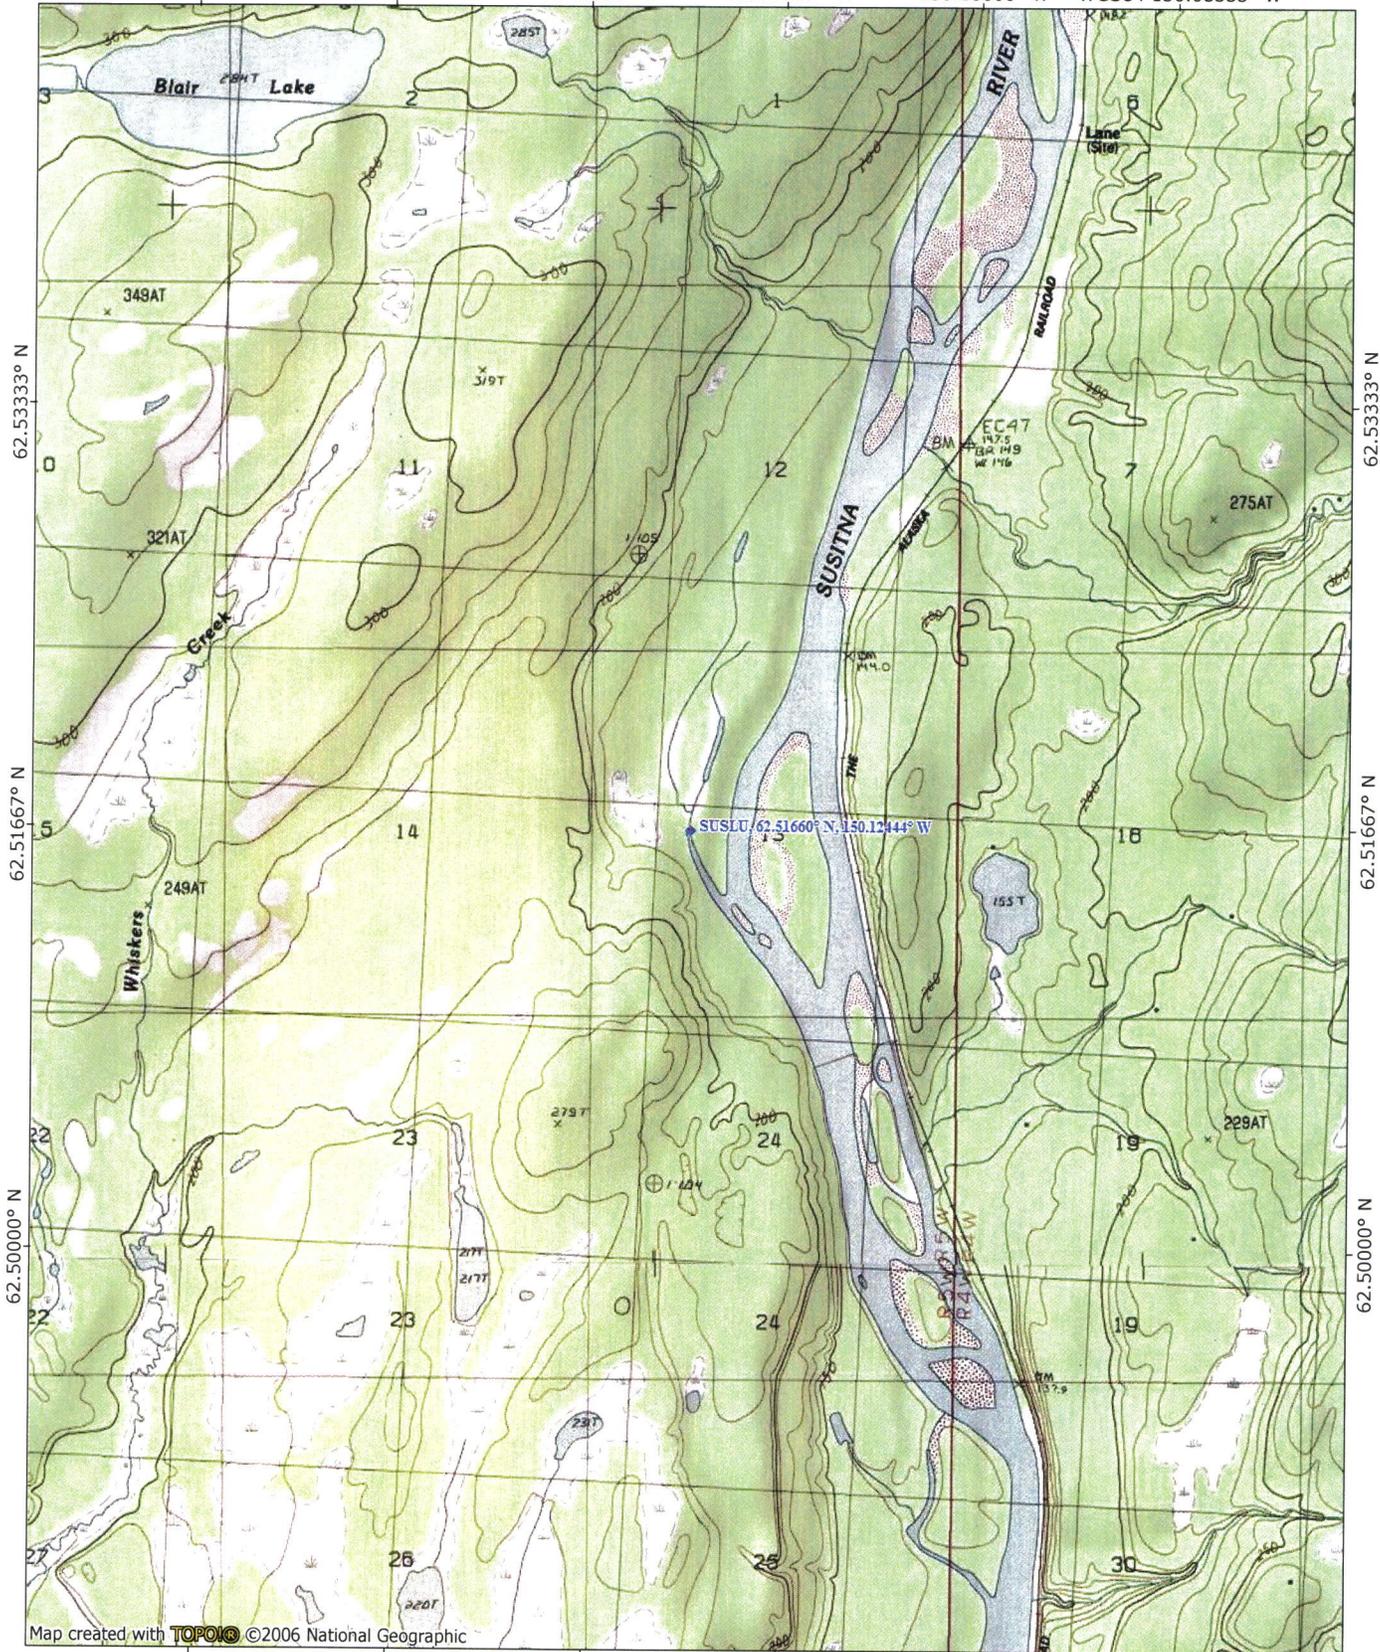

*Is this a new stream or a backwater of the Susitna?*
