coho salmon	10/01/2014			✓	✓

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments:
sampled adult coho in this location for ADFG. Fish numbered around 25 and were all bright red. Did not observe any spawning, just sockeye spawning here. Did not see any upstream of this location either. These fish were concentrated in a large pool.
