OBSERVATION INFORMATION

| Species | Date(s) Observed | Spawning | Rearing | Present | Anadromous |
|---|---|---|---|---|---|
| chinook salmon | 05/21/2014 | | ✓ | | ✓ |
| coho salmon | 05/21/2014 | | ✓ | | ✓ |
| sockeye salmon (1) | 06/04/2014 | | ✓ | | ✓ |
| | | | | | |
| | | | | | |

**IMPORTANT**: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

On May 21, 2014 juvenile Chinook and Coho salmon were collected by backpack electrofishing in lower Slash Creek. On June 4, a juvenile Sockeye Salmon was collected by backpack electrofishing in lower Slash Creek. The 40-m long reach sampled was near the mouth downstream of the railroad crossing.

Coordinates (Lat,Long): Upper(62.50166,-150.102324) Lower(62.50131,-150.10212)

Reposition stream w/ revised hydro, reposition pts
Add Chinook and Coho Salmon REARING to Creek.

Name of Observer (please print): Gerald George

Signature: 63.227.212.201 (Web Nomination) Date: 05/18/2015

Agency:

Address: 14300 SE 1st St STE 150
Vancouver, WA 98684

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.

**From:** Gerald George <ggeorge@r2usa.com>
**Sent:** Thursday, May 28, 2015 10:38 AM
**To:** Johnson, J D (DFG)
**Subject:** Re: Slash Creek

Whoops, it looks like by longitudes got cut off on the map I sent, here is a table corresponding to the waypoints.
Gerald

WPT Lat Long 302 62.50123 -150.10217 303 62.50134 -150.10228 304 62.50151 -150.10235 305 62.50202 -150.10263 306 62.50208 -150.10275 307 62.50231 -150.10256 308 62.50247 -150.1027 309 62.50252 -150.10265 310 62.50257 -150.10268 311 62.50267 -150.10273 312 62.50271 -150.10251

Hi J.

It looks like the AWC polyline is off a little bit to the South for AWC 247-41-10200-2426. Slash Creek flows through two culverts under the raiload and then flows parallel to the Susitna for several hundred meters before the confluence with the Su. The AWC polyline heads perpendicular to the Susitna from the mouth of Slash Creek up a hill side. We have not gone above the railroad culverts which are at 62.50271/-150.10251 so beyond that I'm speculating on the route.

**Interestingly, it looks like the USGS may have had problems mapping in this area low-lying area between the Gash and Slash creeks because their line for the creek coming down the hillside from the east ends in the middle of nowhere instead of connecting to either drainage!** I have attached a few maps of where we have sampled and mapped aquatic habitat with by best guess to the route of Slash creek after the railroad based on imagery and the topography contours. At any rate it looks like the arc should be adjusted a little bit to the north. Give me a call if you want to discuss.

Gerald

I have a question regarding nom # 15-624 (see attached)

The orange line represents the AWC polyline for 247-41-10200-2426

The yellow & light blue dots to the north are the points provided w/nom # 15-624

So my question is – is dept hydrology for Slash Creek off, should stream mouth and lower portion of line be moved to the north?

Or is there another creek to the north between 247-41-10200-2426 & -2436?

What do you think?

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

All 3 species of salmon mentioned above spawned in Slash creek. Chums were seen spawning at mouth.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
