Dear Ms. Weber:

In reply to your memo (12-17-82) concerning the 1983 Anadromous Waters Catalog update, I am sending to you the most current revisions we have for the Seward Ranger District, Chugach National Forest. The base quadrangle maps that you provided were a real asset in determining what nominations we could offer. They will also aid in future updating.

Enclosed you will find the update nomination forms and corresponding USGS quadrangle maps reflecting our new information. Changes are marked in red.

We appreciate this opportunity to work with you in providing input to the catalog. We are also looking forward to supplying you with future updates as we learn more about the fishery resource through our field habitat inventories. The efforts that you and others have put into this project are commendable and important to the management of this valuable resource.

If there are any questions you might have about the attached information please give me a call.

Sincerely,

RALPH BROWNING
Staff Fisheries Biologist
