Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

ADF&G trapped the outlet of Mr Benson's culvert through his haul road for a 7 hr period. Eight coho juveniles were captured ranging in age from 3.2 centimeters to 8.5 centimeters in length

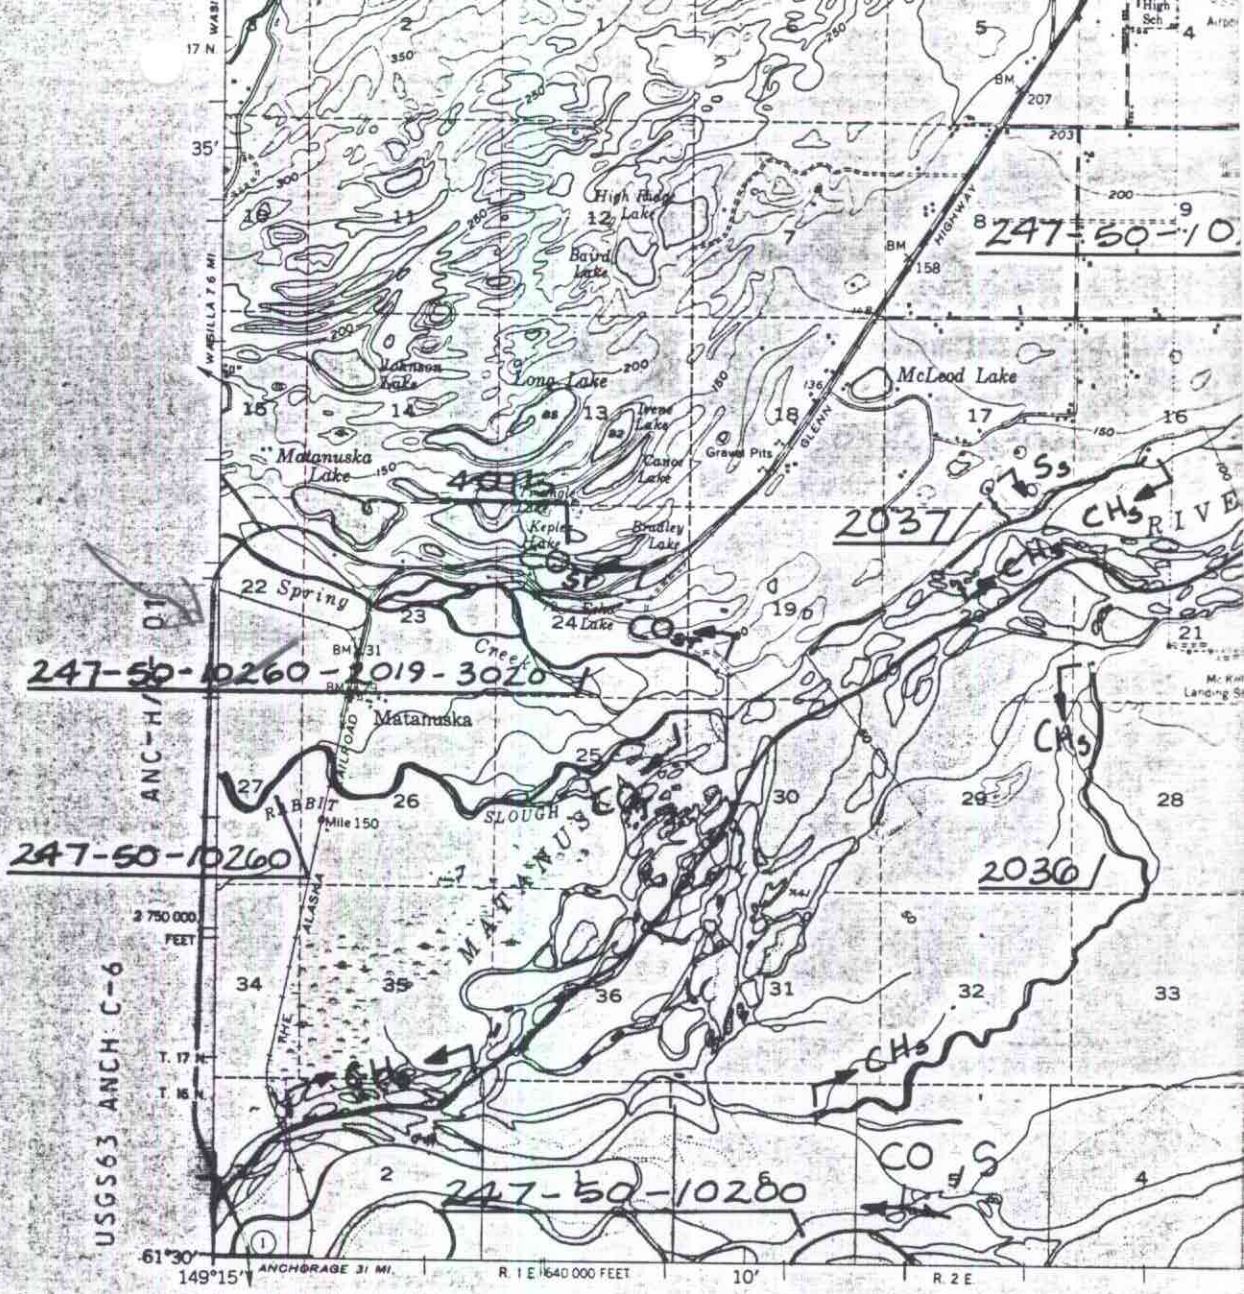
Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

Name of Observer (please print) Gary S. Liepitz

Date: 6/2/88 Signature: Gary S Liepitz

Address: ADF&G
333 Raspberry Rd Anch. Ak. 99518

Signature of Area Biologist:



Mapped, edited, and published by the Geological Survey

Control by USGS, USC&GS and USCE

Topography by photogrammetric methods from aerial photographs taken 1949, field annotated 1951. Map not field checked

Universal Transverse Mercator projection, 1927 North American datum
10,000-foot grid based on Alaska coordinate system, zone 4
1000-meter Universal Transverse Mercator grid ticks, zone 6, shown in blue

Land lines printed in gray represent unsurveyed and unmarked locations predetermined by the Bureau of Land Management. Folios S-1 and S-14, Seward Meridian

Swamps, as portrayed, indicate only the wetter areas, usually of low relief, as interpreted from aerial photographs
