Name addition:

USGS name none

Local name none

Species	Date(s) Observed	Spawning	Rearing	Migration
Pink	7/83; 7/84; 7/85	X		

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Pink salmon were seen spawning and moving up and down the lower reaches of the small stream at the southwest part of the bight in the North Arm of Nuka Bay where the large waterfall falls near Storm Mountain. About 60 salmon occur in this drainage which is also frequented by black bear. Salmon do not run in the main drainage here.

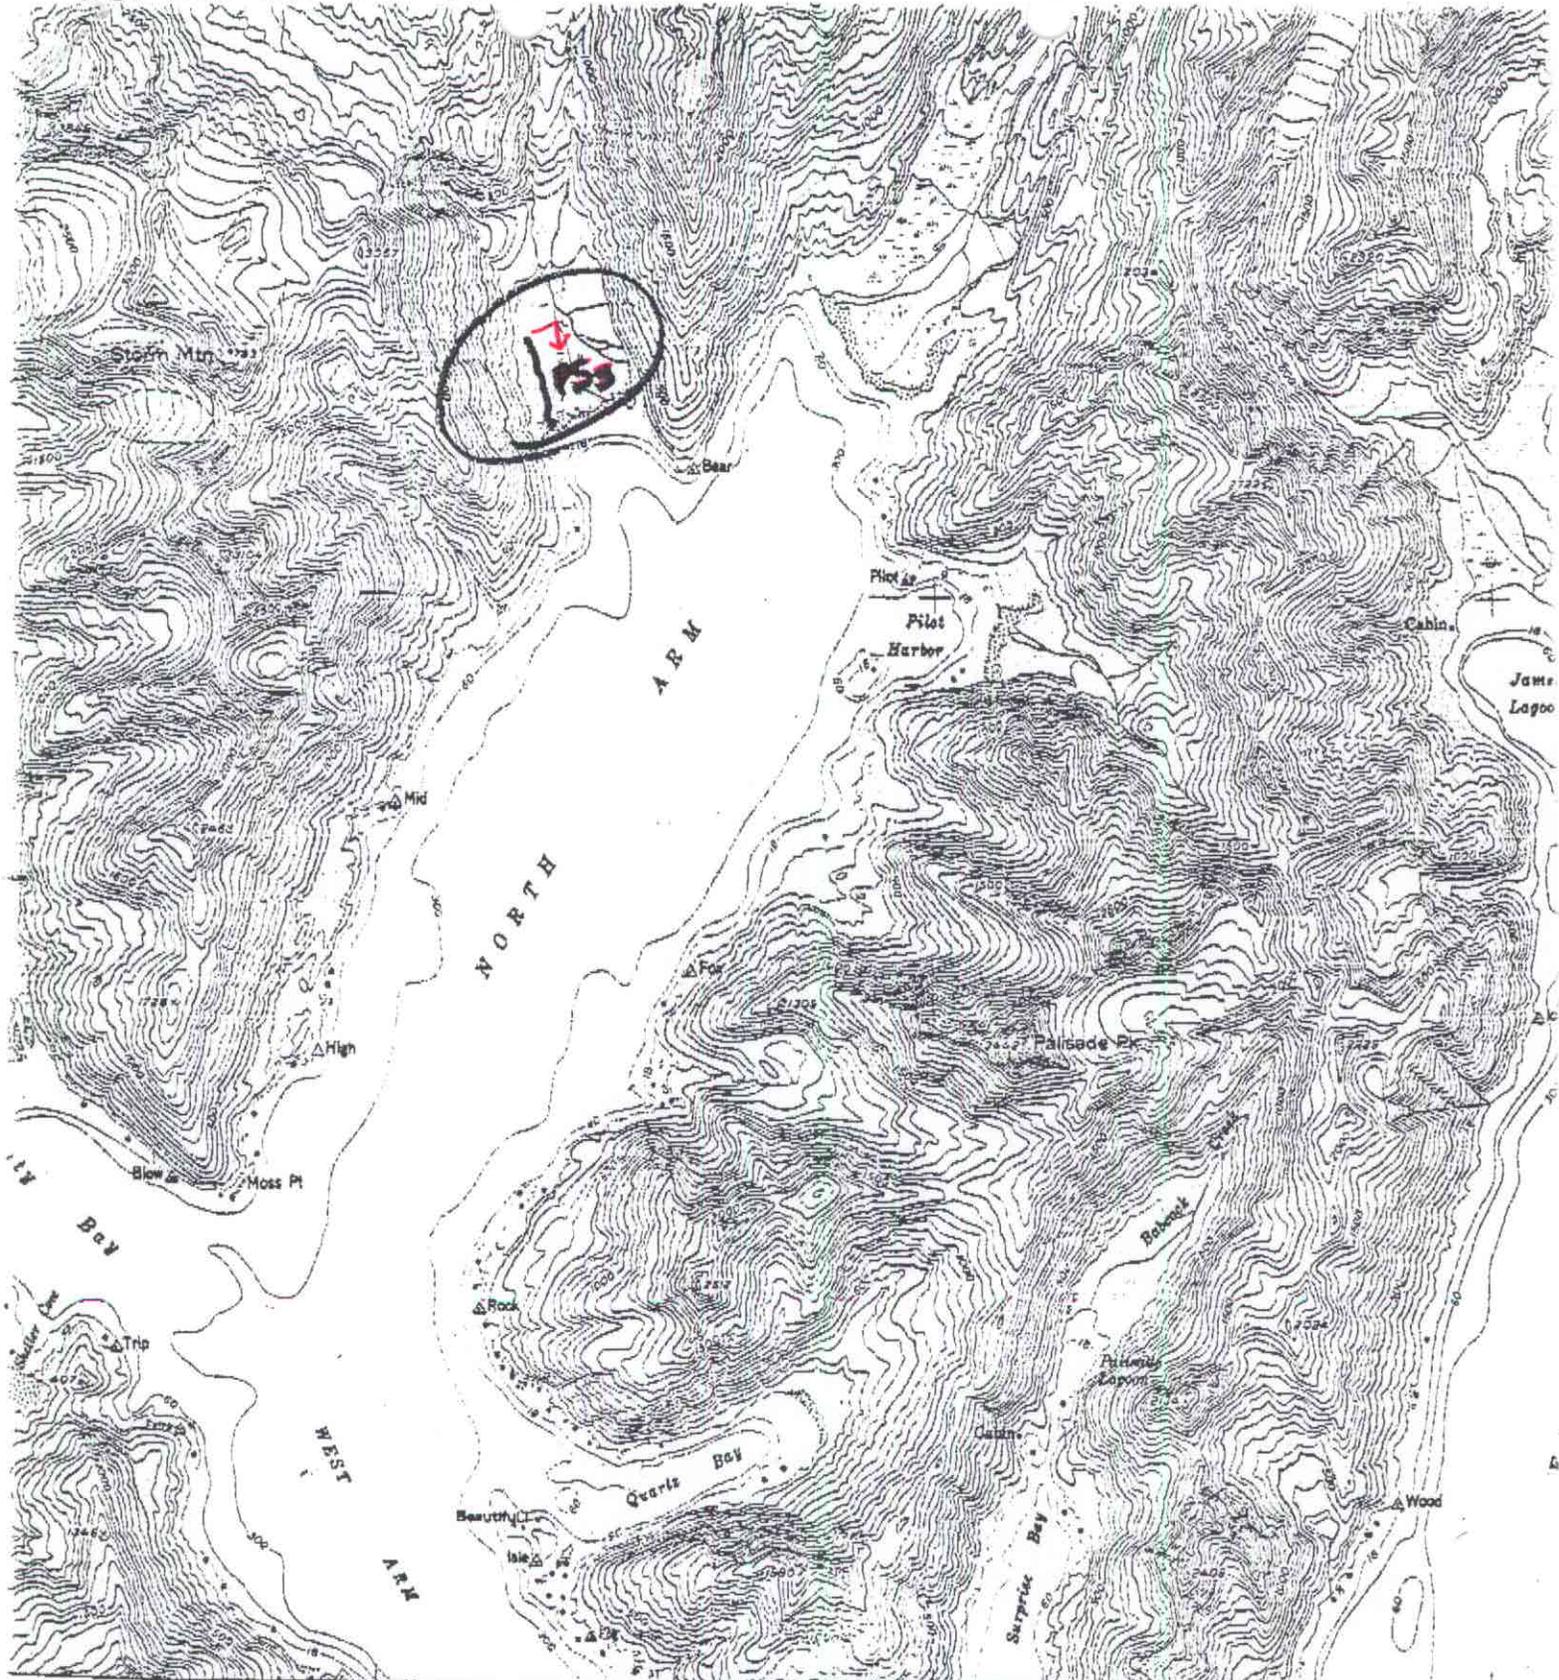

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
