Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

About 60 pink salmon were seen in this clear meandering stream at the Northwest corner of the North Arm of Nuka Bay. This stream is different than the one noted in the atlas and catalog as 232-23-10080 which lies at the northeast side of the head of North Arm. Black bear are prevalent in the area.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
