Pink	18 August 1989	X		

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Six spawned and dead pink salmon were seen along the banks of this stream. The carcasses were observed above the high tide line but less than a quarter mile from the outlet of the stream. The stream is steep and rocky farther in from the sea.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
