Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

7 adult coho salmon were observed in this stream. Stream bed contained good spawning gravel in certain locations. Most salmon seemed to be holding over redds.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
