IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: ~ 100 to 200 red salmon carcasses ^{observed} while walking this stream.
The last observed carcass was found just before reaching the boggy
area about 3/4 mile from mouth. This stream is an unnamed trib
on the north side of Upper Trail Lake.
