Revision Year: <u>95</u>	Regional Supervisor	Date
Revision to: Atlas _____ Catalog _____	<u>ED Weir</u>	<u>12/19/94</u>
Both <u>X</u>	<u>2 Inone</u>	<u>12/22/94</u>
Revision Code: <u>D-2</u>	Drafted	Date

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: A natural barrier falls prevents fish passage upstream. The falls is approximately 1.5 miles from the confluence with Little Kamishok River. It is roughly 25-30 ft. high pitching vertically into a large plunge pool. The falls has existed for many years. Catalog should not reflect migration or spawning beyond this point.

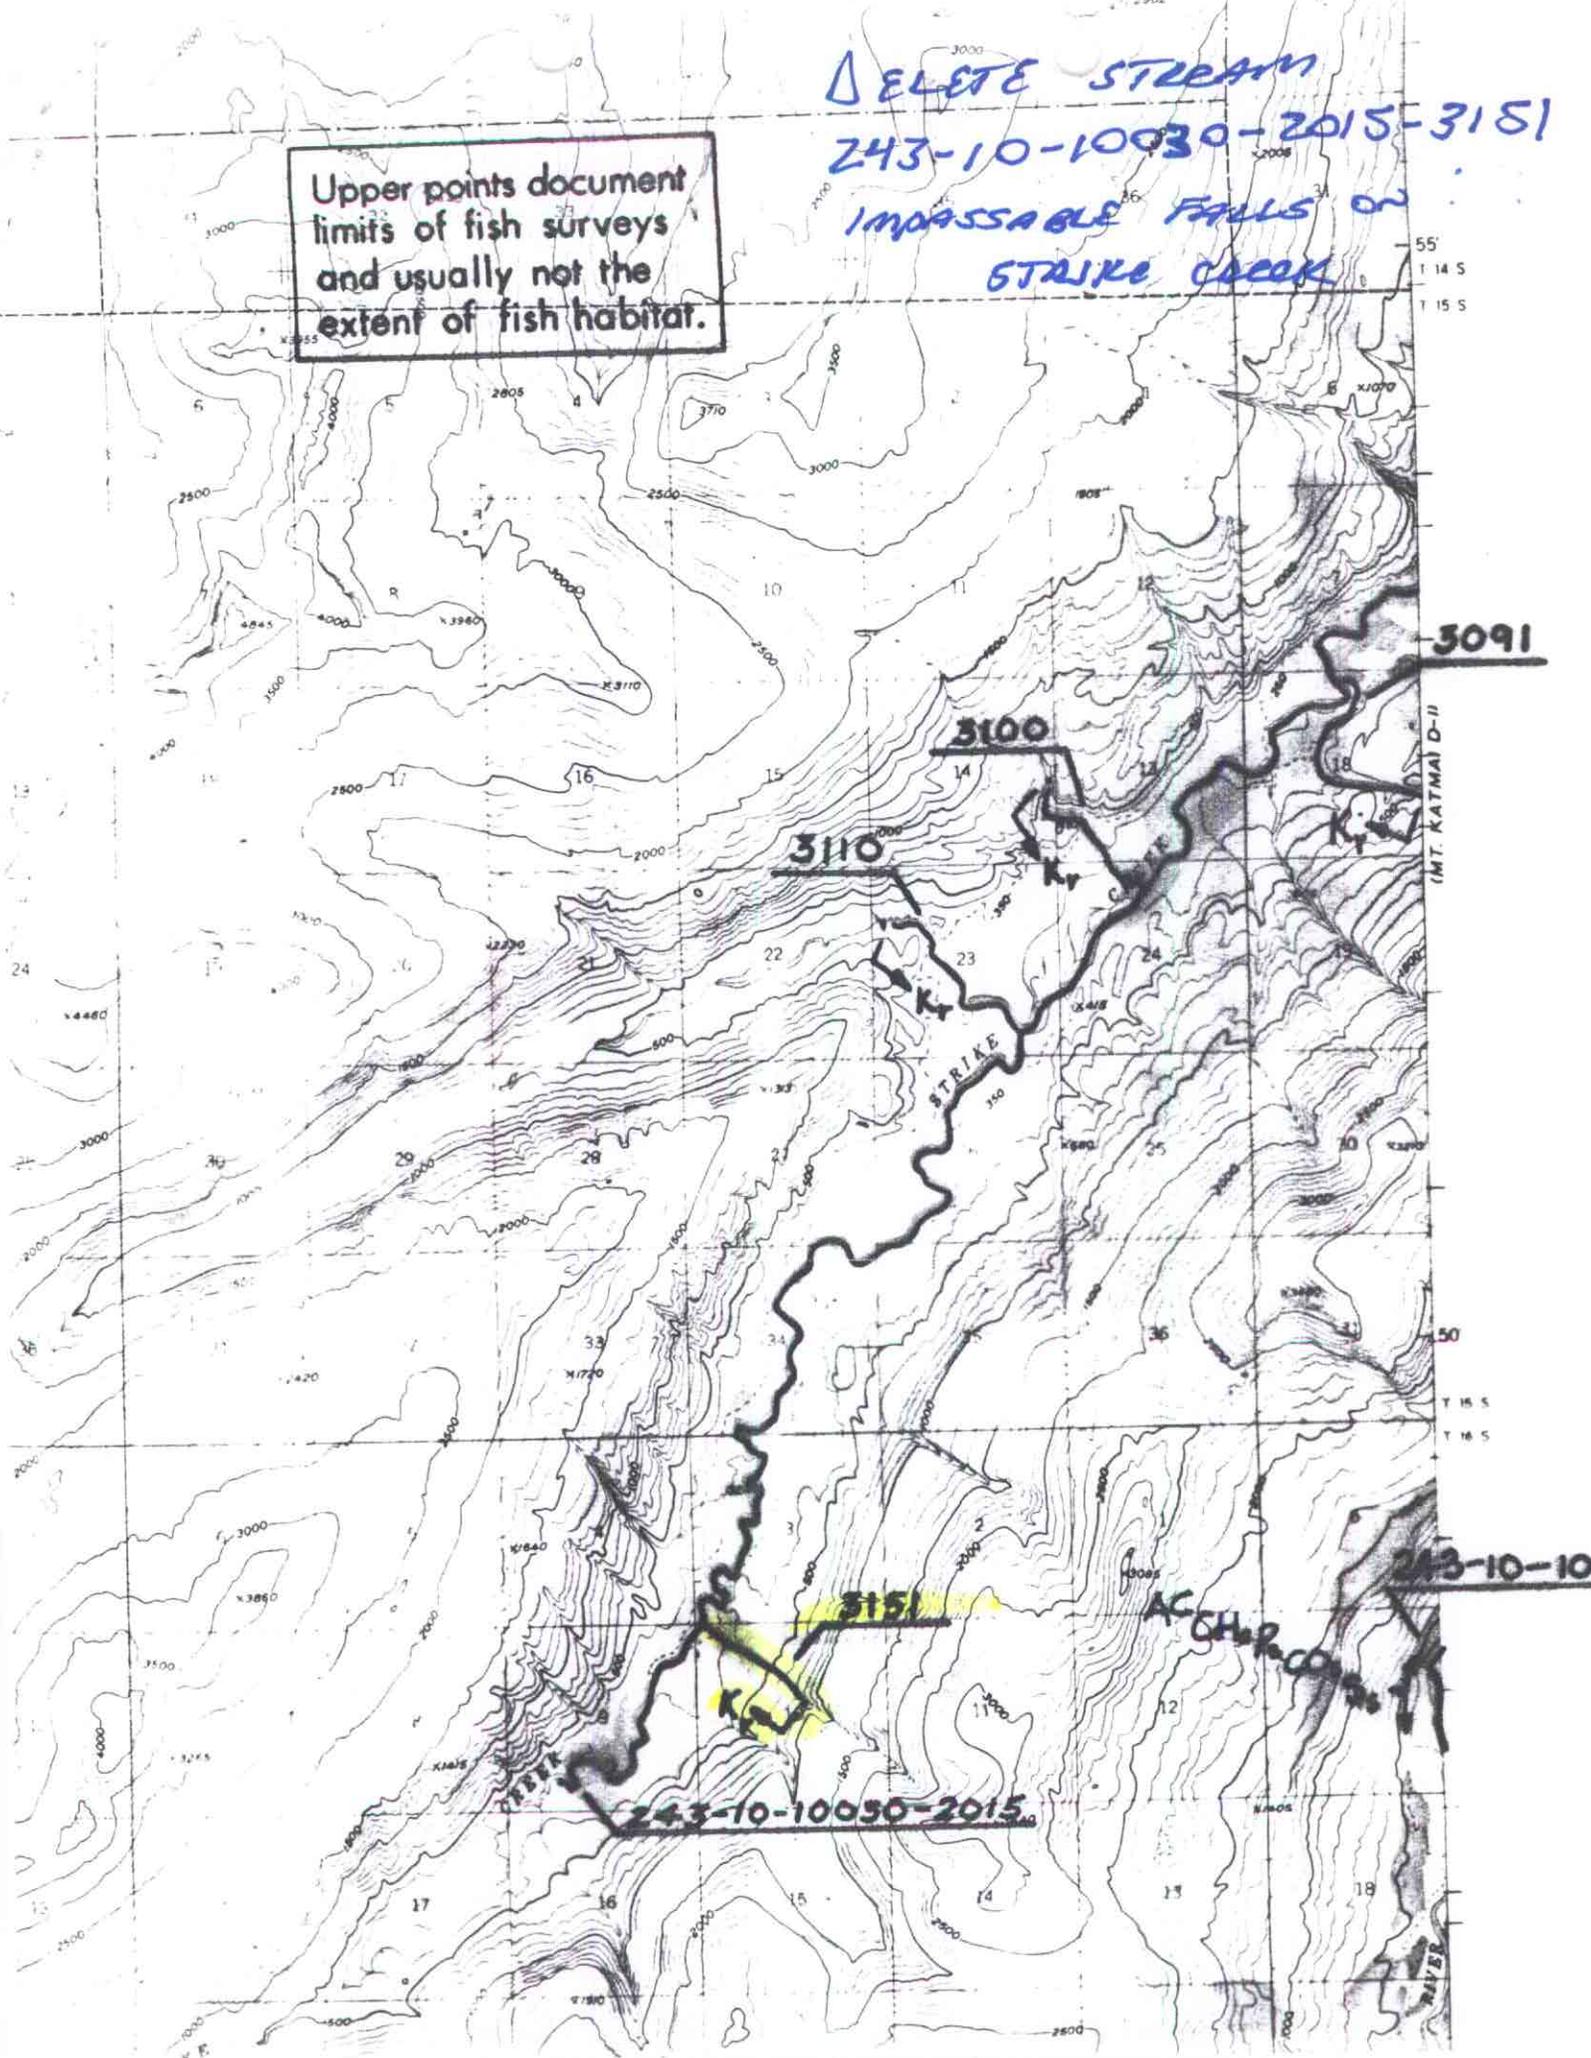

Name of Observer (please print) WESLEY BUCHER ALASKA DEPT. OF FISH & GAME
 Date: 10/5/94 Signature: Wesley Bucher OCT 07 1994
 Address: 329B DOUGLAS ST. HOMER, AK. 99603 REGION II AND RESTORATION HABITAT DIVISION

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: Wesley Bucher Rev. 7/93

Upper points document
limits of fish surveys
and usually not the
extent of fish habitat.
