OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Pink	5/20/96	Yes		Yes	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Site sampled during ADF&G, Habitat and Restoration Division's, participation in a Forest Practices inspection of Eyak Corporation's timber harvest operation. Adult pink salmon carcasses were observed adjacent to the channel to 50 feet upstream of the intertidal zone. No physical blockages were observed at this point; however, no additional signs of anadromous fish use were observed during a cursory inspection. Actual anadromous fish distribution may extend further upstream than I have designated on the attached map. Most spawning is probably intertidal.

ALASKA DEPT. OF FISH & GAME

Address:

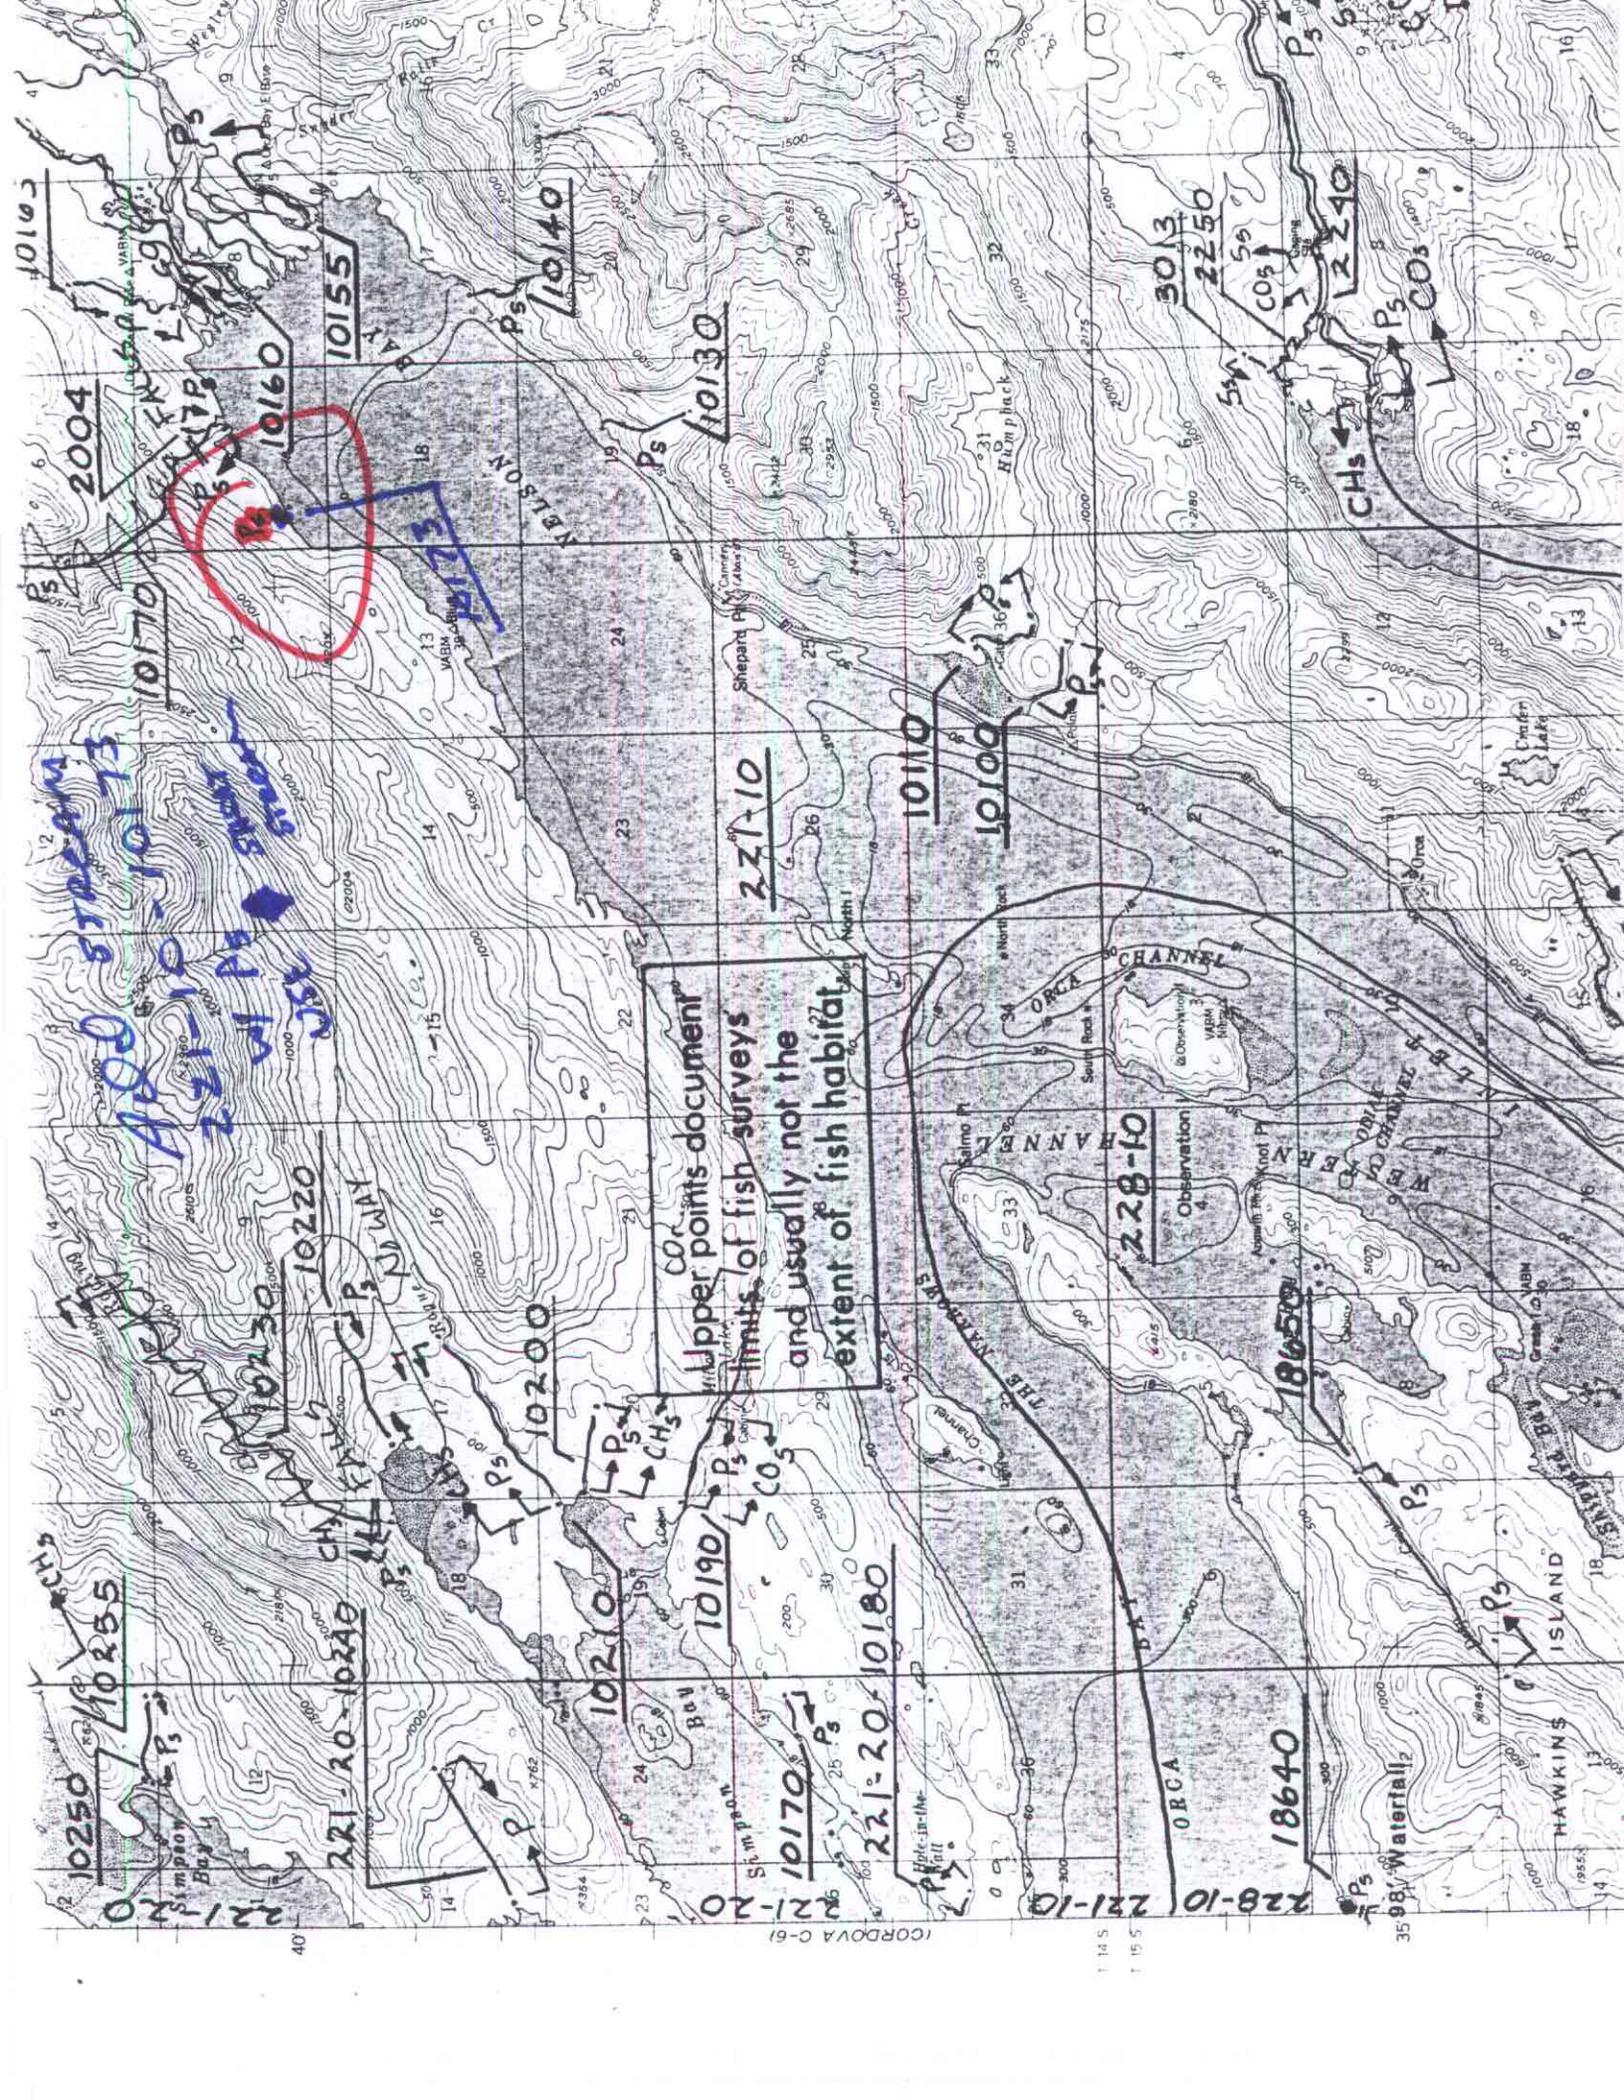

Alaska Department of Fish and Game

333 Raspberry Road, Anchorage, AK 99518

REGION II AND RESTORATION DIVISION

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: \_\_\_\_\_

Upper points document limits of fish surveys and usually not the extent of fish habitat.
