IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

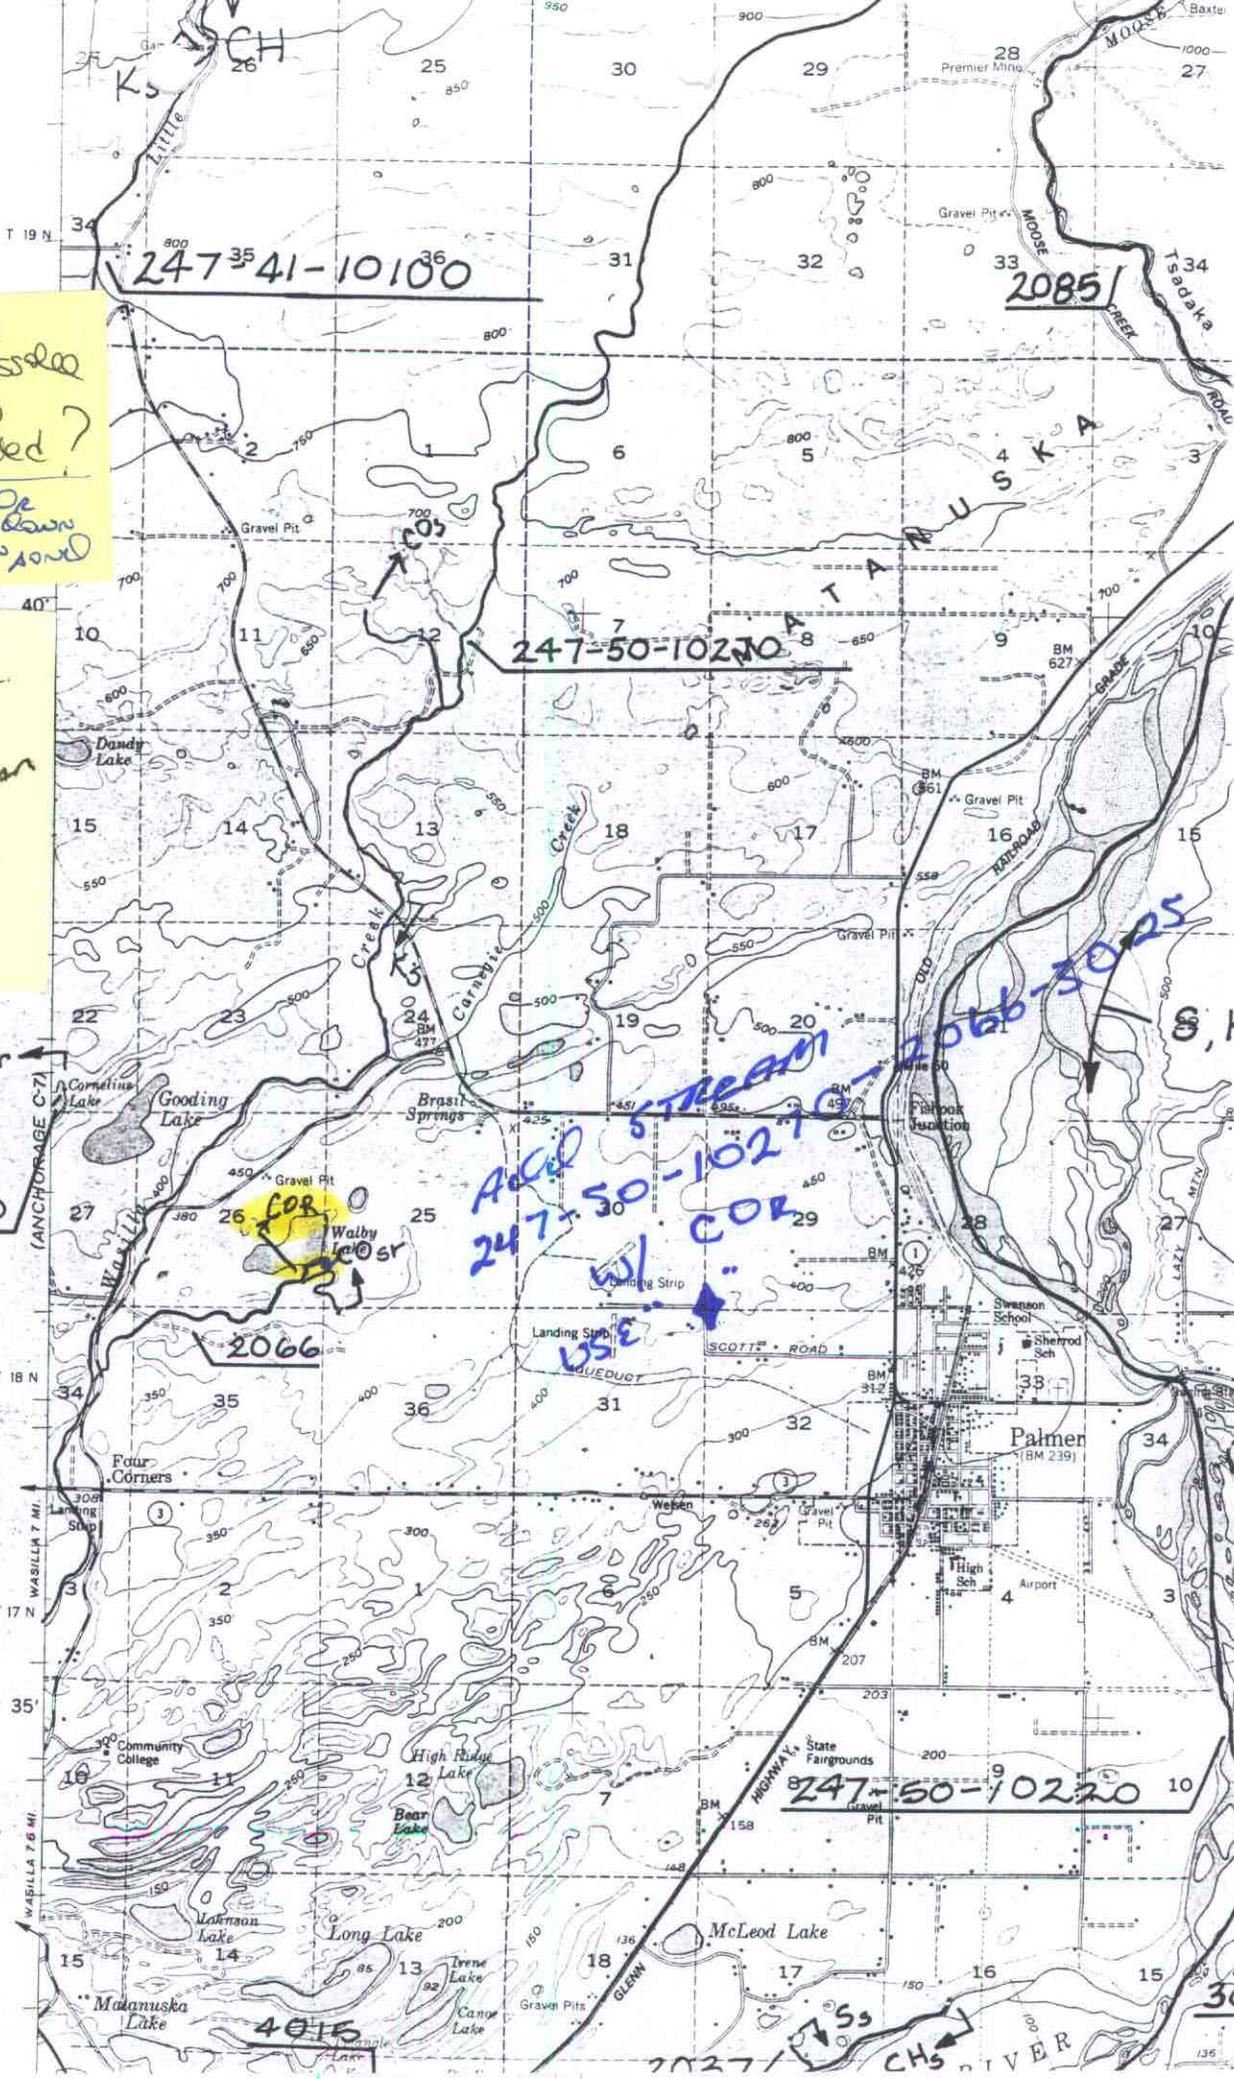

Comments: A Walleye lake drains into Wasilla Cr. by percolating ~~underground~~ the resulting creek runs under sea gull drive and into 2066. Coho fry are common in the pond on the east side of Sea gull drive. Enstar put a gas line through the creek a few years ago without a permit. ^{and} Recontoured the pond.
