OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** Delete stream per attached information and request from Cevin Gilleland and Steve "Slim" Morstad. Stream dry, pinks may spawn there during high water times but probably do not survive.

Date: 10/7/97

This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

CAUSED 10/2/97 SUM,  
NOT IN, LFT MESS.  
RETURNED CALL 10/3 I WANT IN.  
(over)

Can you check with Glenn in  
Orfova about removing  
Honey Creek from the Catalog.

It's my understanding that

CF surveyed Honey Ck

in a number of years &  
found no pink spawning.

If there are no longer fish we  
should get it out of the

Catalog ~~ASAP~~

Let me know so I can deal  
with DNR + Dick Bove thanks  
can
